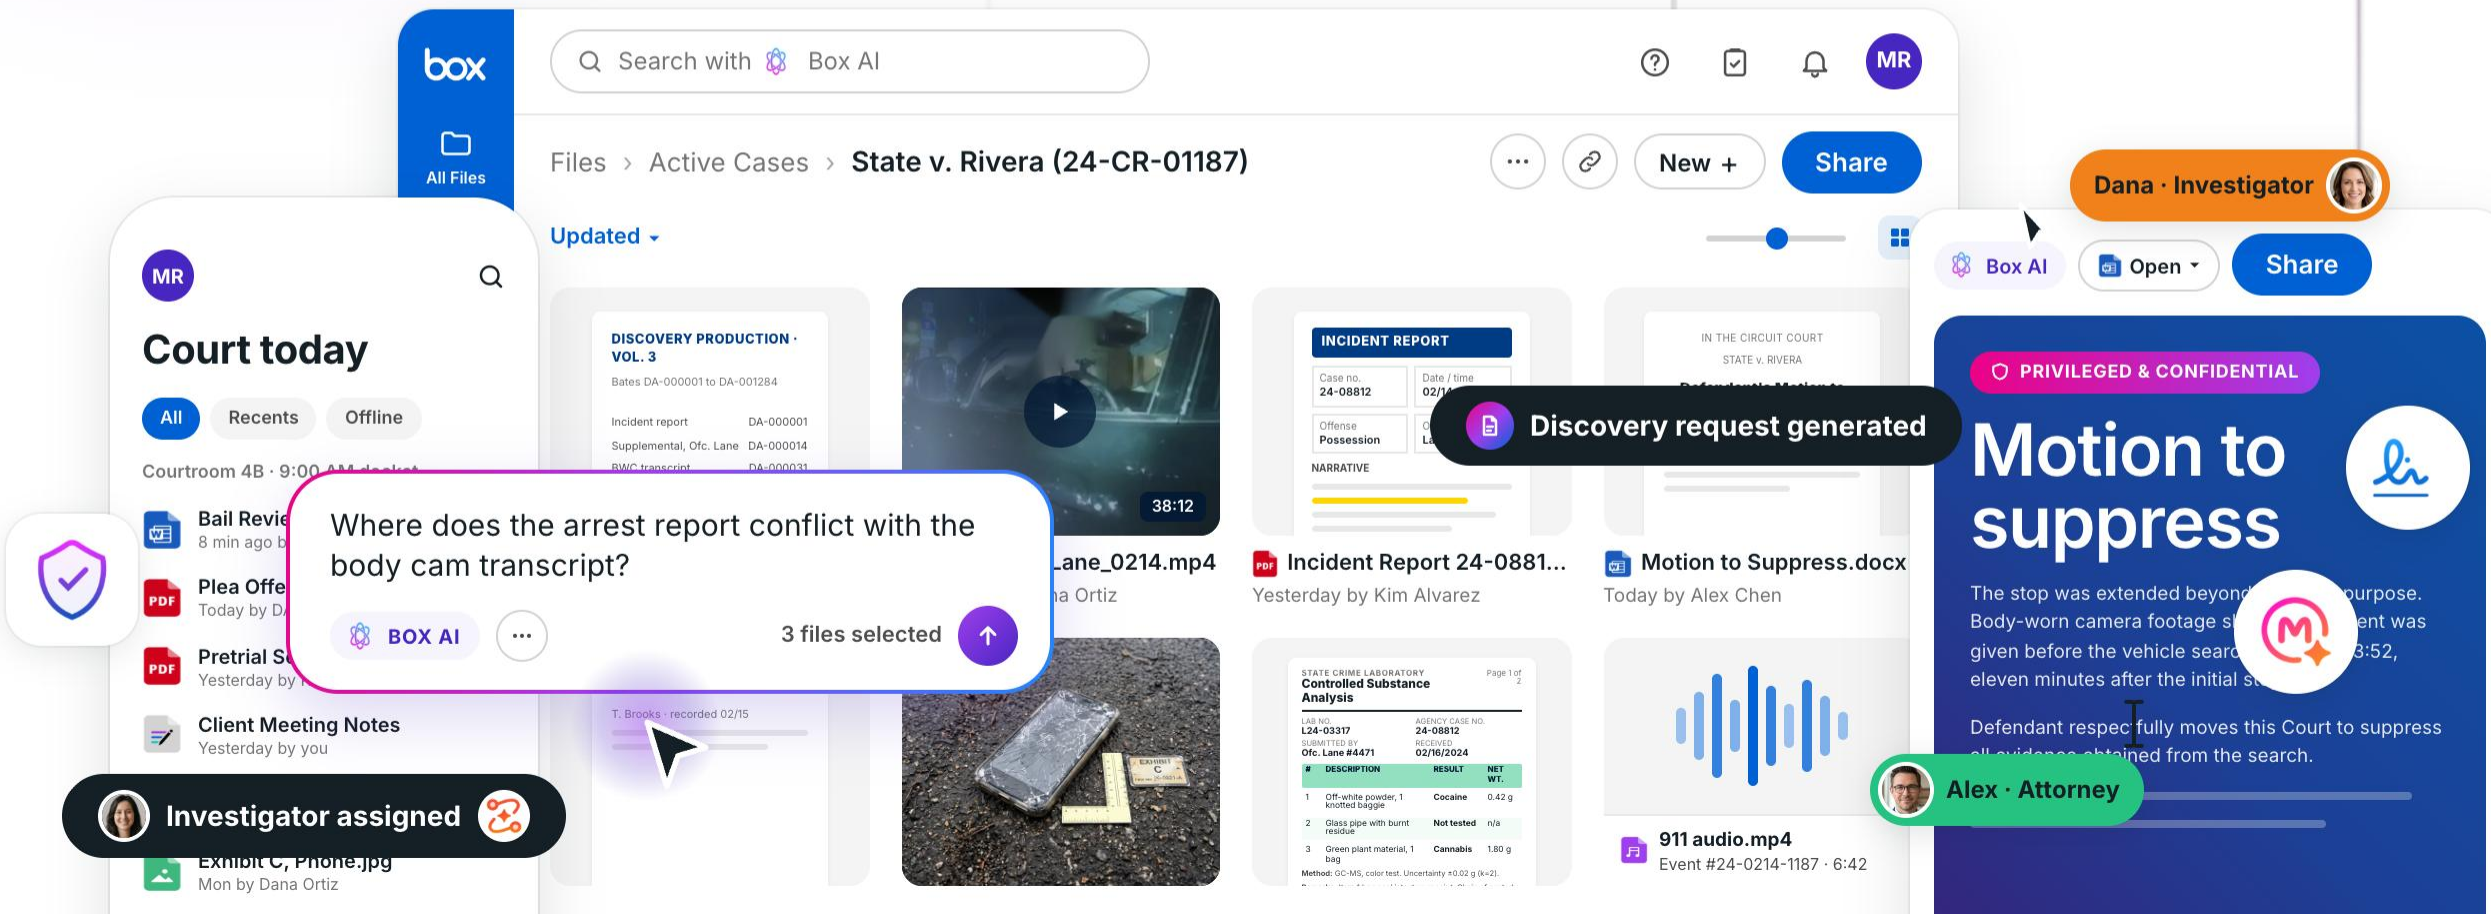
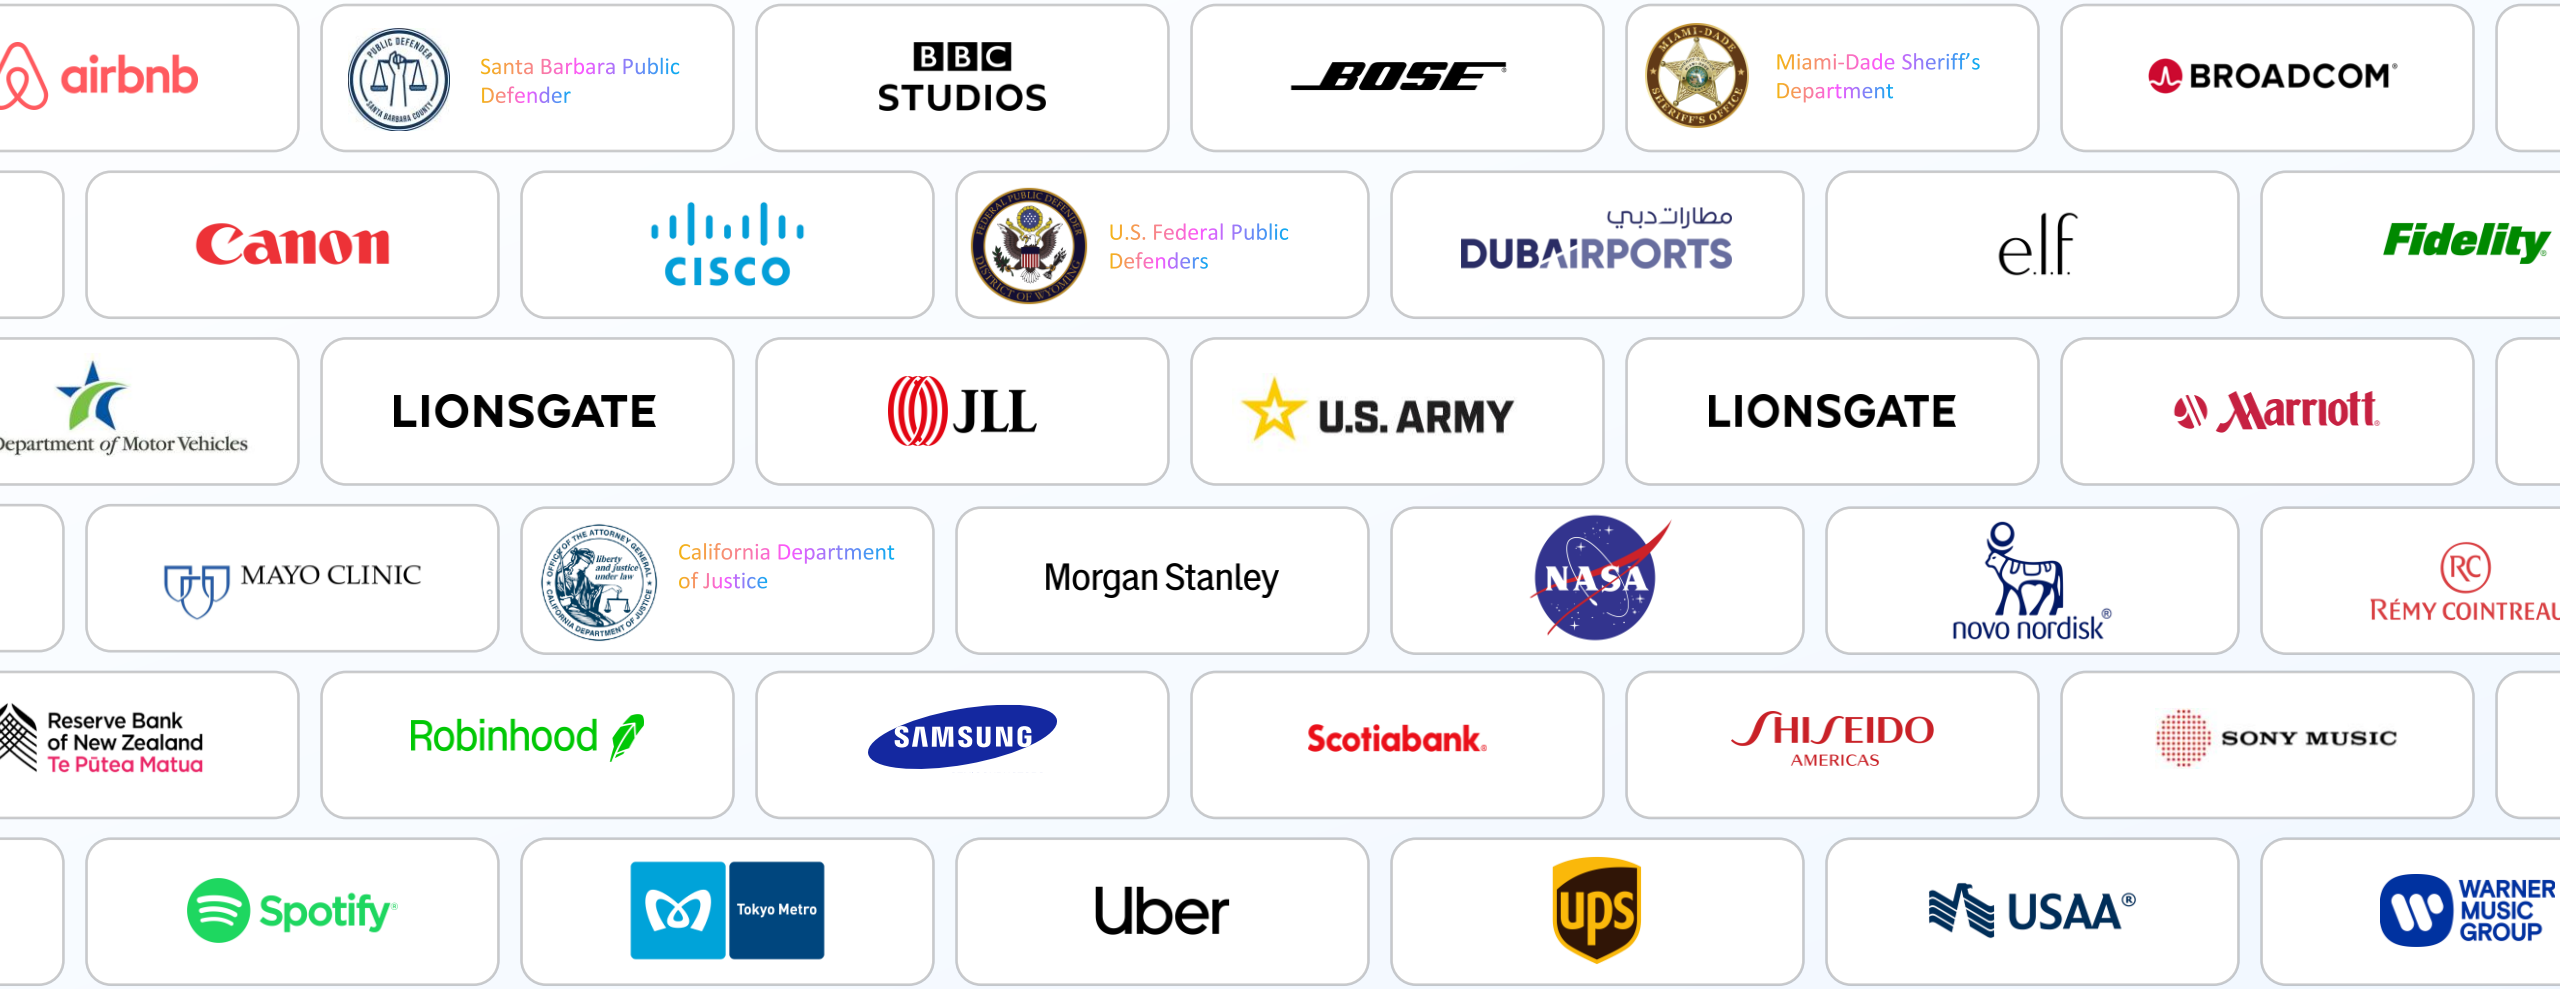
Intelligent Content Management

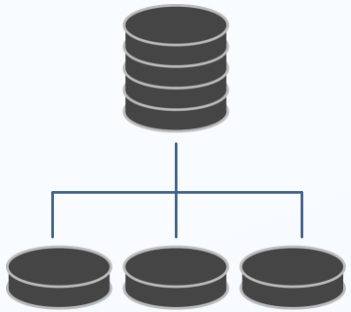


Trusted by 120K+ total enterprises



10%

Structured data



90%

Unstructured data

WHY NOW

The evidence explosion

Public defense was built for paper files. Discovery now arrives as unstructured digital evidence, on strict deadlines.

Body-worn camera footage

Surveillance and drone footage

Mobile device extractions

Forensic reports

Police reports and court records

Hard drives, flash drives and email

~700 TB

of storage at the LA County Public Defender's Office, with a 40-year retention requirement

Attorneys as human middleware

Proprietary vendor systems trap evidence. Teams copy, transcribe and re-key data between disconnected tools.

INTELLIGENT CONTENT MANAGEMENT FOR JUSTICE & PUBLIC SAFETY

One secure content layer for every case

Box works alongside your case management system. It doesn't replace it.

1,500+ pre-built integrations like Microsoft 365, Adobe, Google, Slack, Salesforce, Oracle NetSuite and more

DISCOVERY COMES IN

- Agency evidence portals
- Network file shares
- Hard drives and flash drives
- Email

box Intelligent Content Management

Box Shield
Classify and protect PII and CJI automatically

Box AI
Permissions-aware answers, cited to the source
