NACo produces video success stories for county energy projects

WASHINGTON, D.C. – The National Association of Counties (NACo) today unveiled 11 short videos featuring county success implementing energy projects. The videos were produced in partnership with EcoMedia CBS and filmed at NACo’s County Forum on Energy Efficiency and Renewable Energy in January 2011.

Each three- to five-minute video includes interviews with county officials and staff, as well as images of county projects. Topics covered include: solar panel installation, energy efficiency upgrades, electric vehicle purchases, landfill gas-to-energy projects, and residential energy efficiency campaigns.

Counties featured include: Allegheny County, Pa.; Broward County, Fla.; Dorchester County, S.C.; Frederick County, Md.; Los Angeles County, Calif.; Maricopa County, Ariz.; McHenry County, Ill.; Snohomish County, Wash.; Sonoma County, Calif.; Tarrant County, Texas; and Will County, Ill.

“It was a pleasure to be featured in Tarrant County's video. I look forward to sharing the video with my community,” said NACo President Glen Whitley.

“These video projects will help increase the profile of counties as leaders in energy efficiency and renewable energy,” said Commissioner Gregg Goslin, Cook County, Ill. and chair of NACo’s Green Government Advisory Board.

The videos are posted online:

###

The National Association of Counties (NACo) is the only national organization that represents county governments in the United States. Founded in 1935, NACo provides essential services to the nation’s 3,068 counties. NACo advances issues with a unified voice before the federal government, improves the public’s understanding of county government, assists counties in finding and sharing innovative solutions through education and research, and provides value-added services to save counties and taxpayers money. For more information about NACo, visit www.naco.org.
