

The Future of Urban Mobility

**UBER**

More than  
1,200,000,000  
cars in the world

22% of all carbon emissions come from transportation

Cars sit idle 95%  
of the time

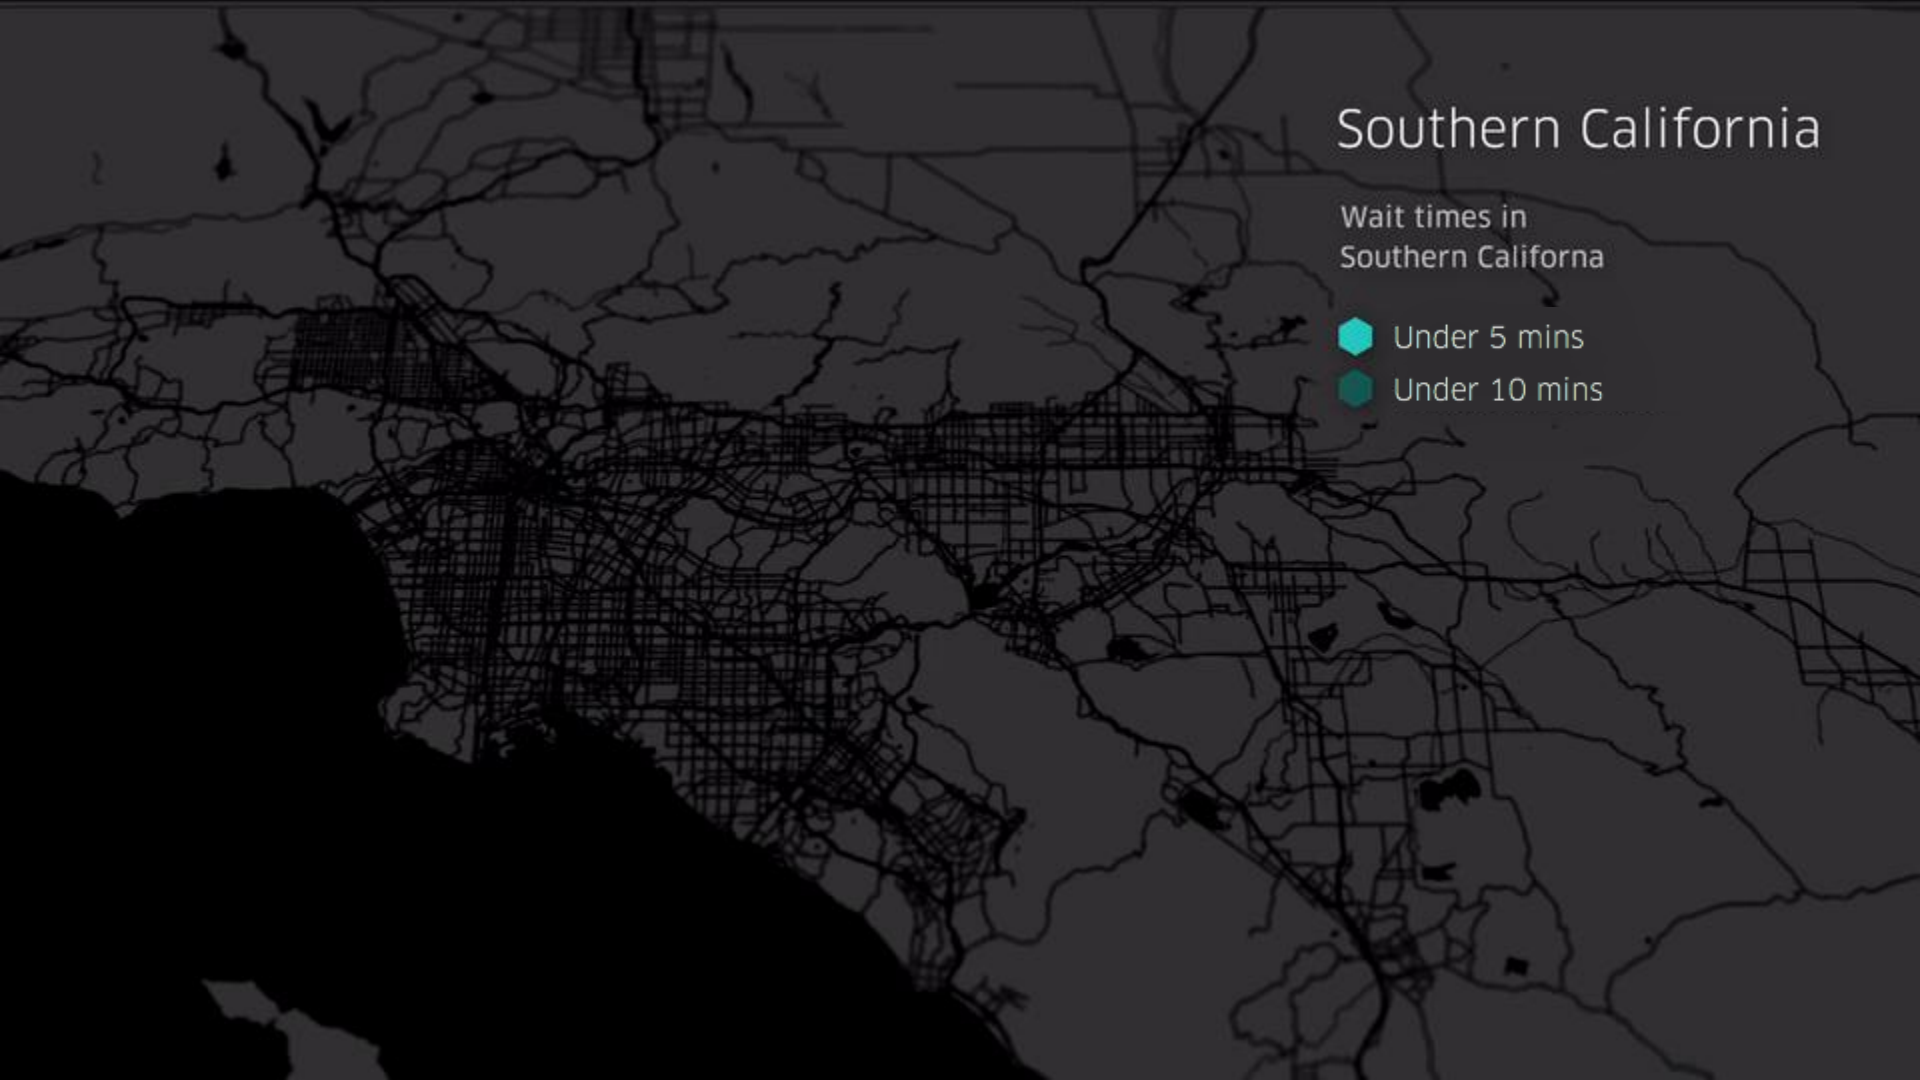

# Southern California

Wait times in  
Southern California

-  Under 5 mins
-  Under 10 mins

# Friday night closing time

## Uber requests

- Amsterdam
- London
- Paris
- Stockholm
- Warsaw

# More Options. Shifting Mindsets. Driving Better Choices:

Helping to make roads safer - for everyone

U B E R

# Pickup locations

2012

NEW YORK

Each dot represents  
location where a  
trip started

Trip started

# Complements public transport

LONDON

- Uber trip
- Train station

## New Jersey town decides to pay Uber instead of building a parking lot

The city says the deal will help free up nearly 100 parking spots at the transit station, as well as keep it from having to spend millions of dollars to build additional parking.

**THE VERGE**

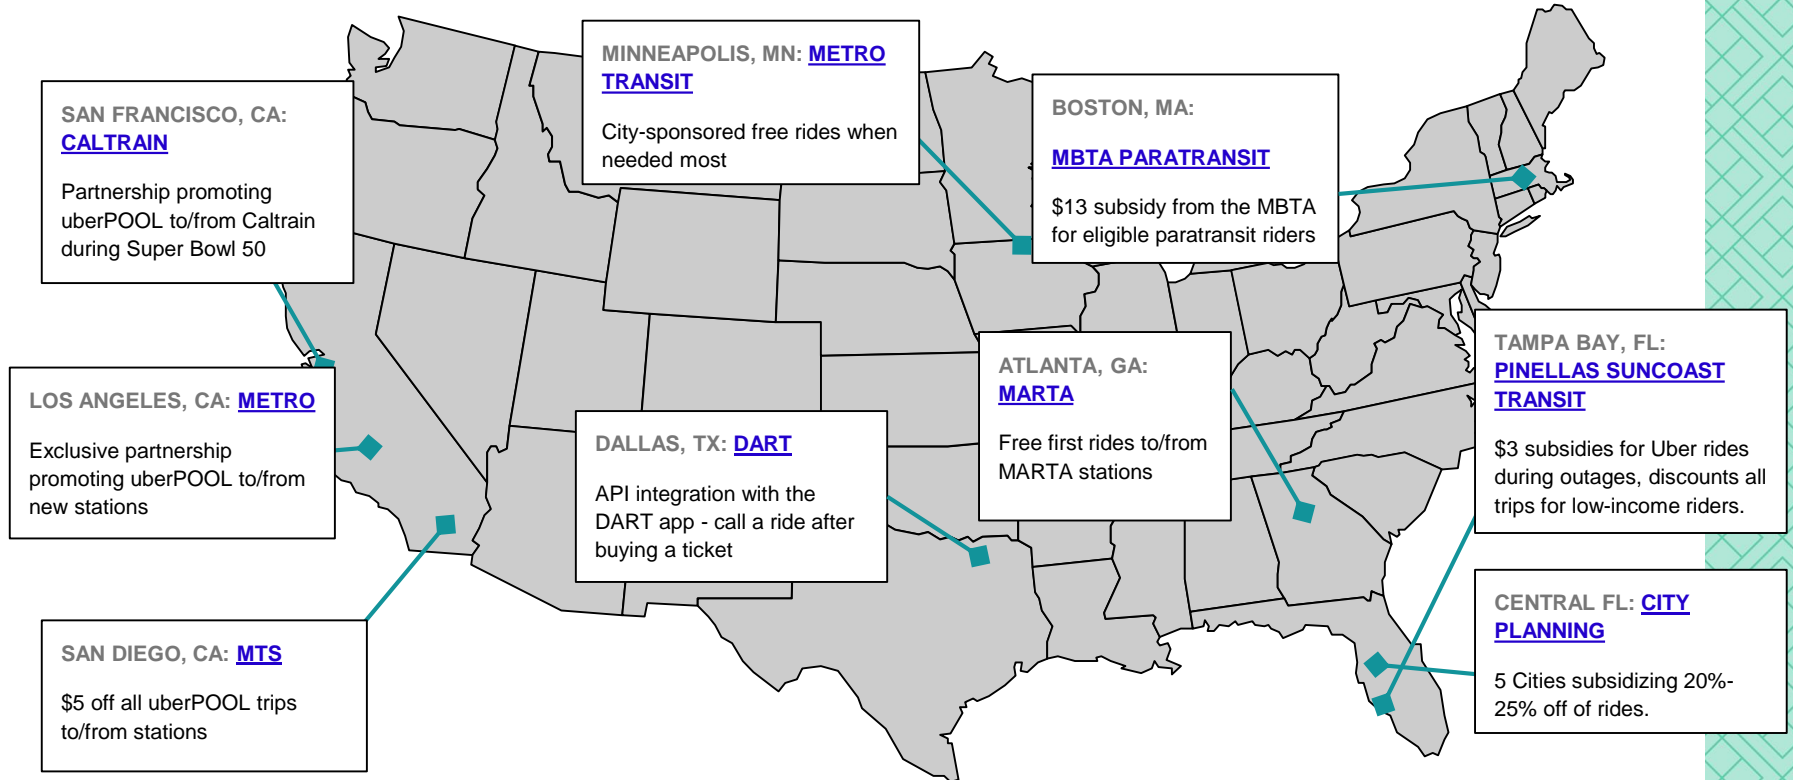

## MBTA to subsidize Uber, Lyft rides for customers with disabilities

Customers are going to get reduced fares, much shorter wait times...and the MBTA is going to get a much lower operating cost on these trips.

**The Boston Globe**

# Nation-wide Transit Authority Partnerships

We have learnings from partnerships across the country and now know what works for improving first mile / last mile logistics

Total Uber trips

uberPOOL trips

TRAFFIC VOLUME

312 million miles

That's greater than the  
distance between Earth  
and the Sun

6.2 million gallons  
of fuel

That would fill more than 9  
Olympic swimming pools

55,560 metric  
tons of CO<sub>2</sub>

## Miles traveled & shared miles

FORECASTS FOR MAJOR REGIONS

Today ride-hailing accounts for 4% of all miles driven globally. By 2030 it will be 25%

Shared self-driving cars  
would reduce the  
number of cars on the  
road by 90%
