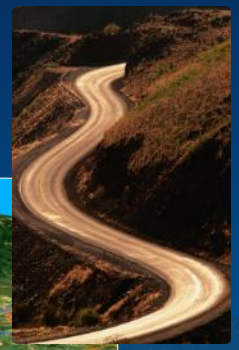
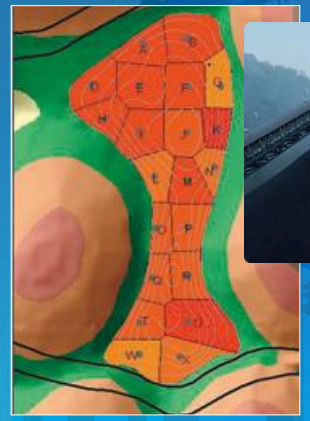
Transportation



Land Use & Development

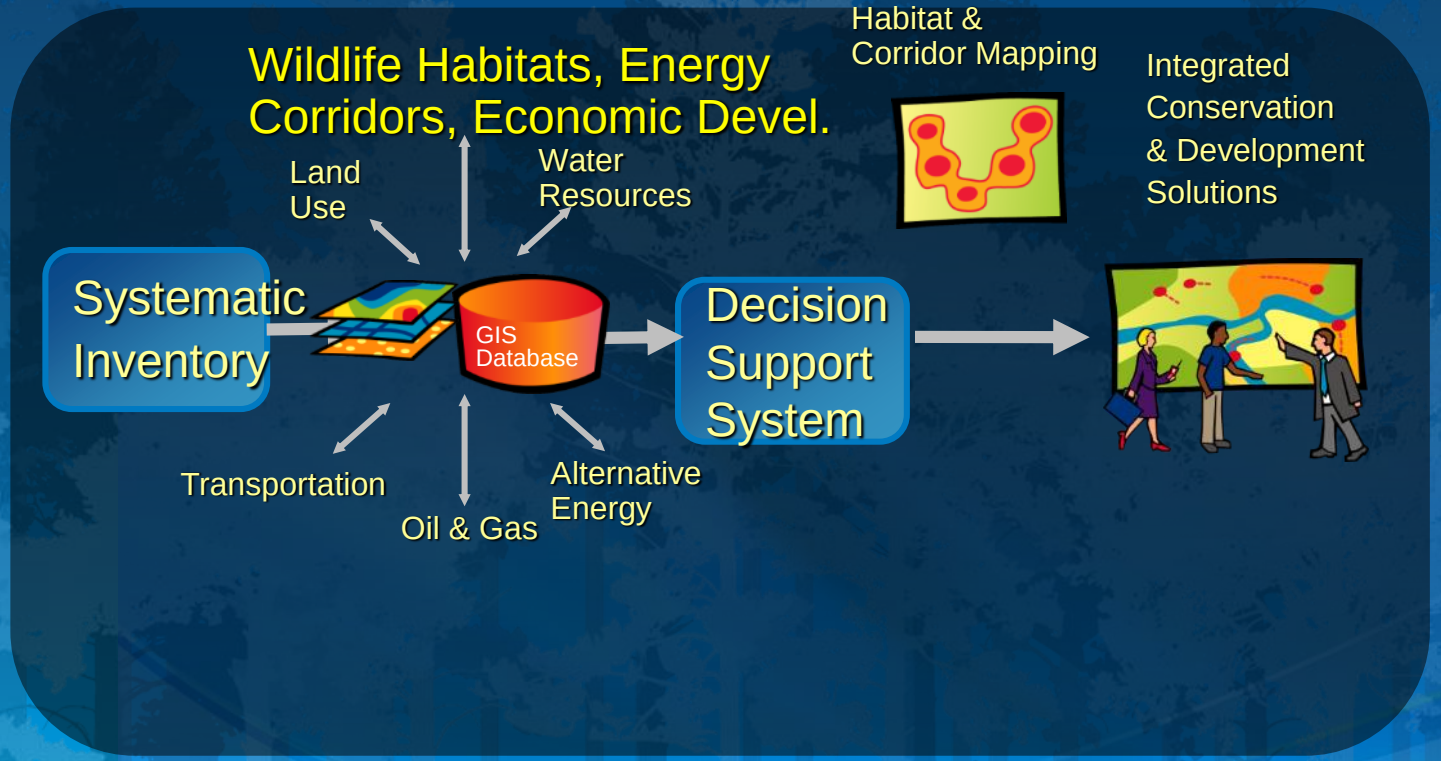
Energy

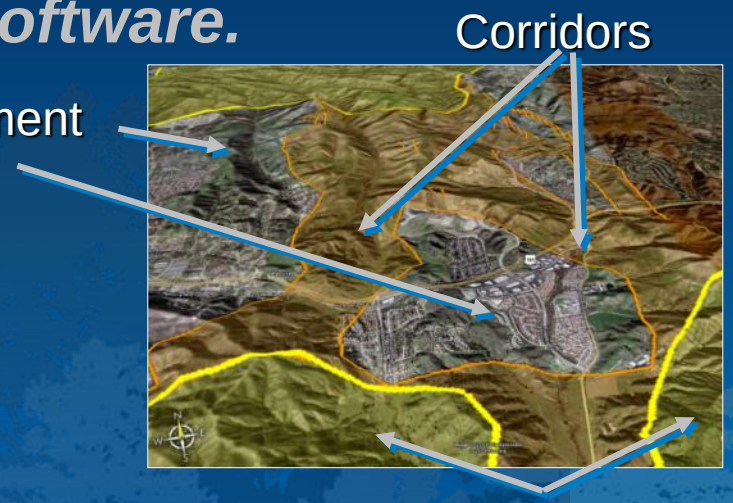


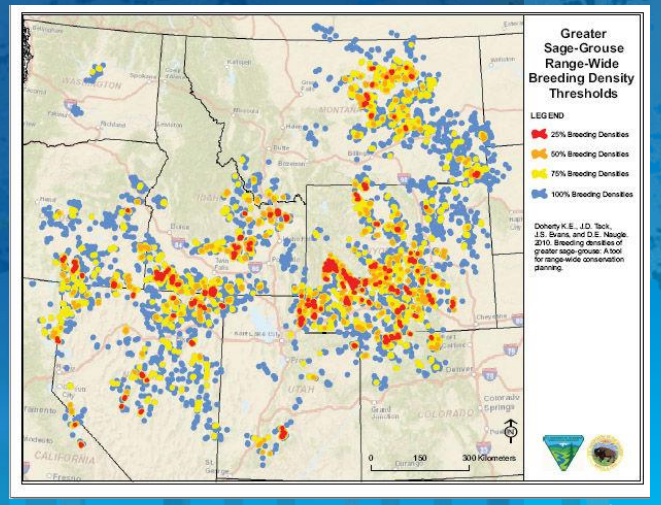
. . . Policy and Business Decisions Considered Incrementally …Often in isolation

A System for Collaboration, Action

GIS as a Platform. . . a System, not a Software.





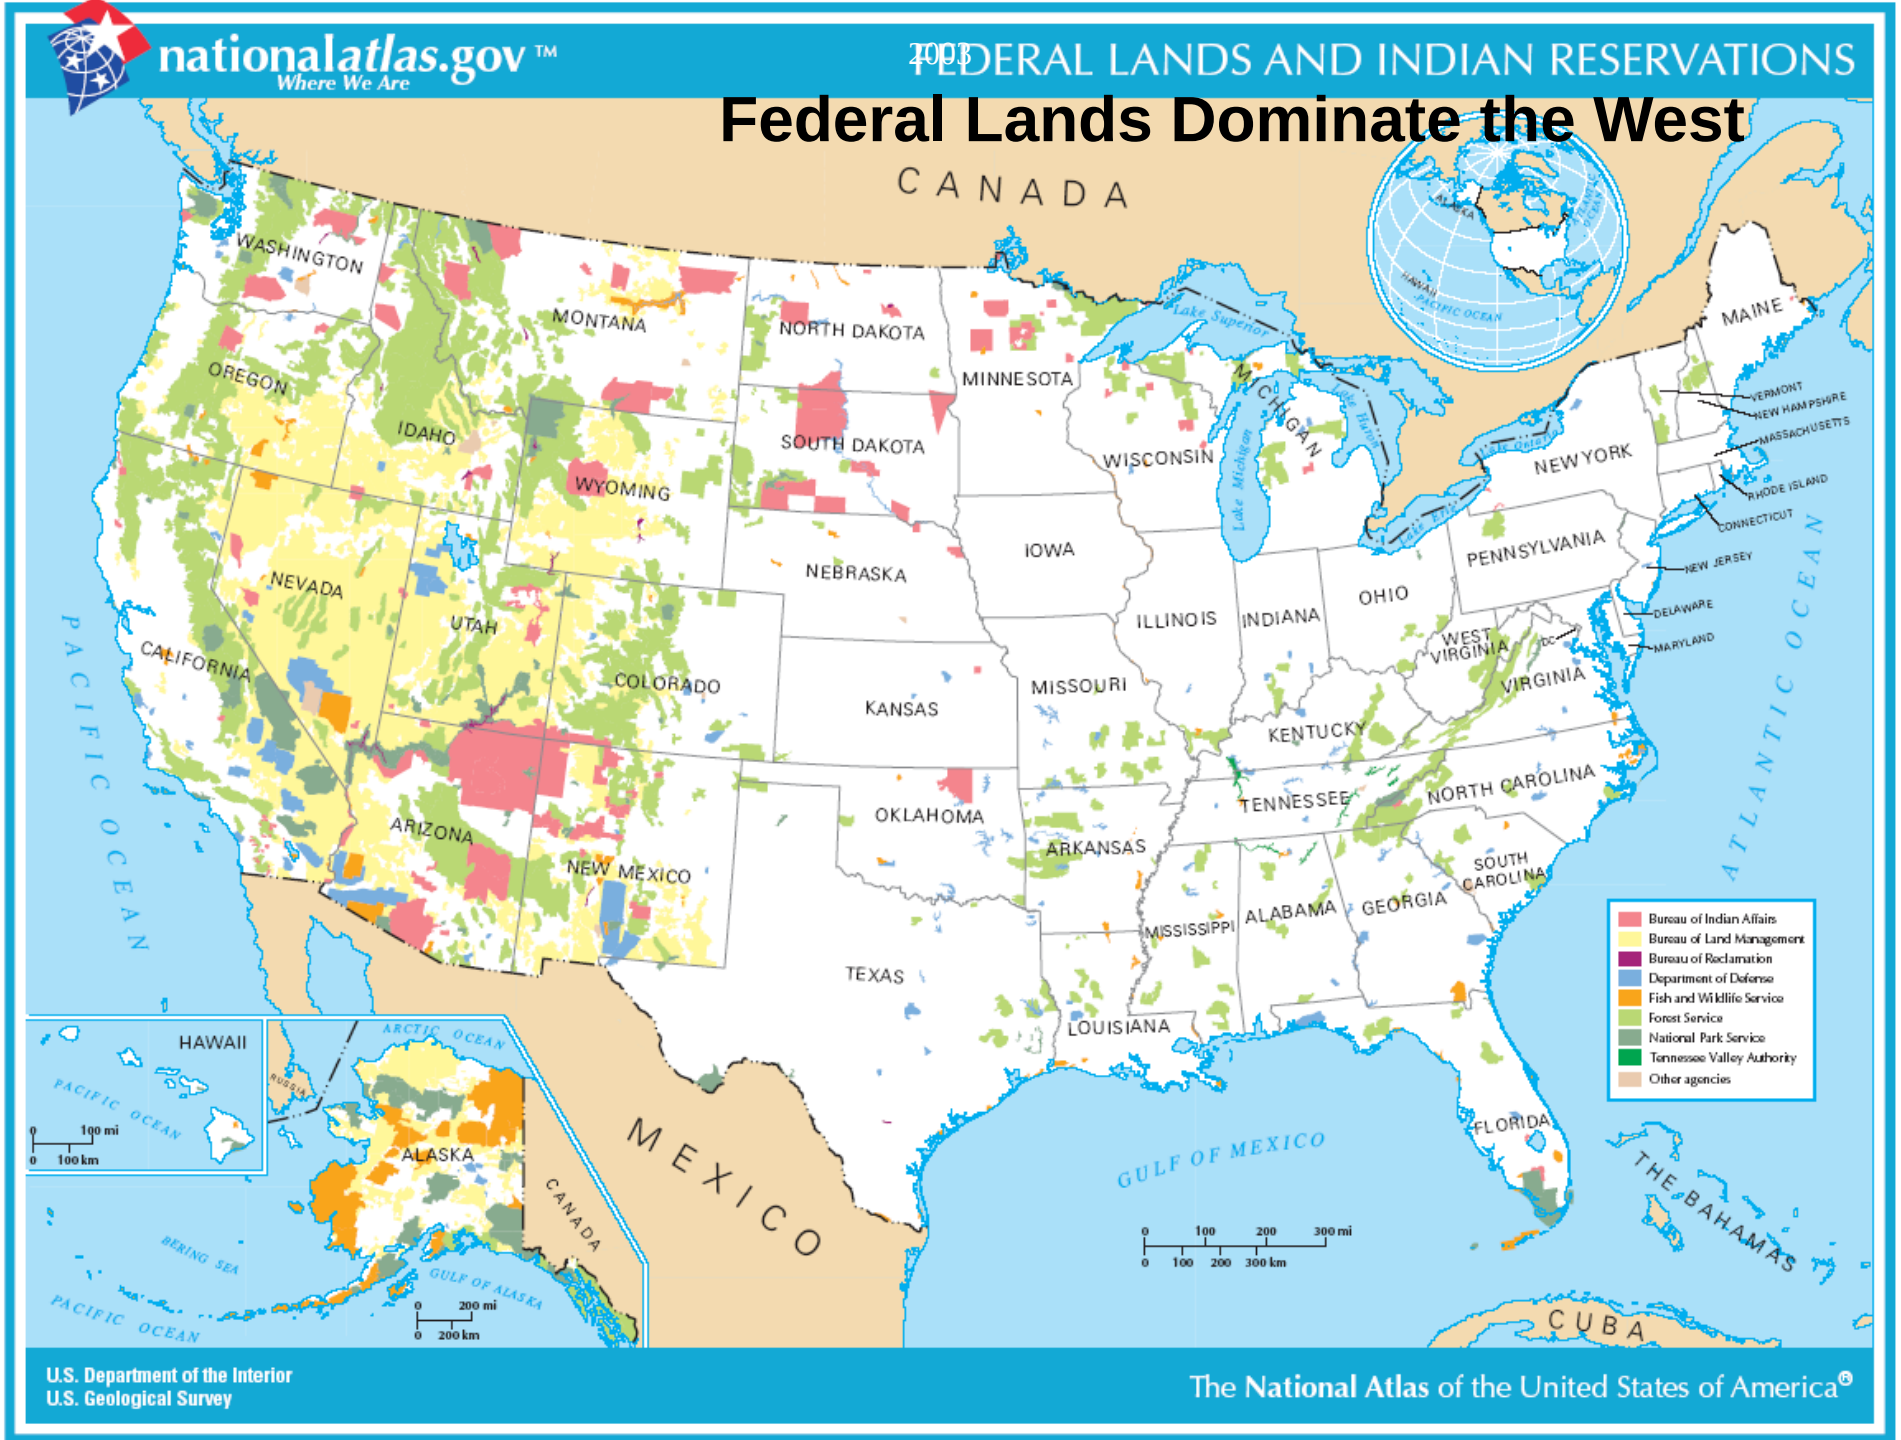


GIS in Government
Connecting People, Places and Policy

- This Governor's Experience as a convener
- Information in context
- Visualization is key to context
- GIS as a powerful platform
  - for Decision Makers
  - for everyday activities
  - Ever increasing public expectations
- Information Integration – Not an option but a necessity
  - Cross-boundary Collaboration, Planning, Modeling, Action
  - Web and Cloud based
  - Mobile tech

- **All Decisions Are Local –**

In Impact



The Need For a Convener

Western Land Management

- Concurrent, not exclusive, responsibilities for resource development
  - Land, air, water, minerals, species
- Local impact on economic and social issues
- National managers only “Updated” us

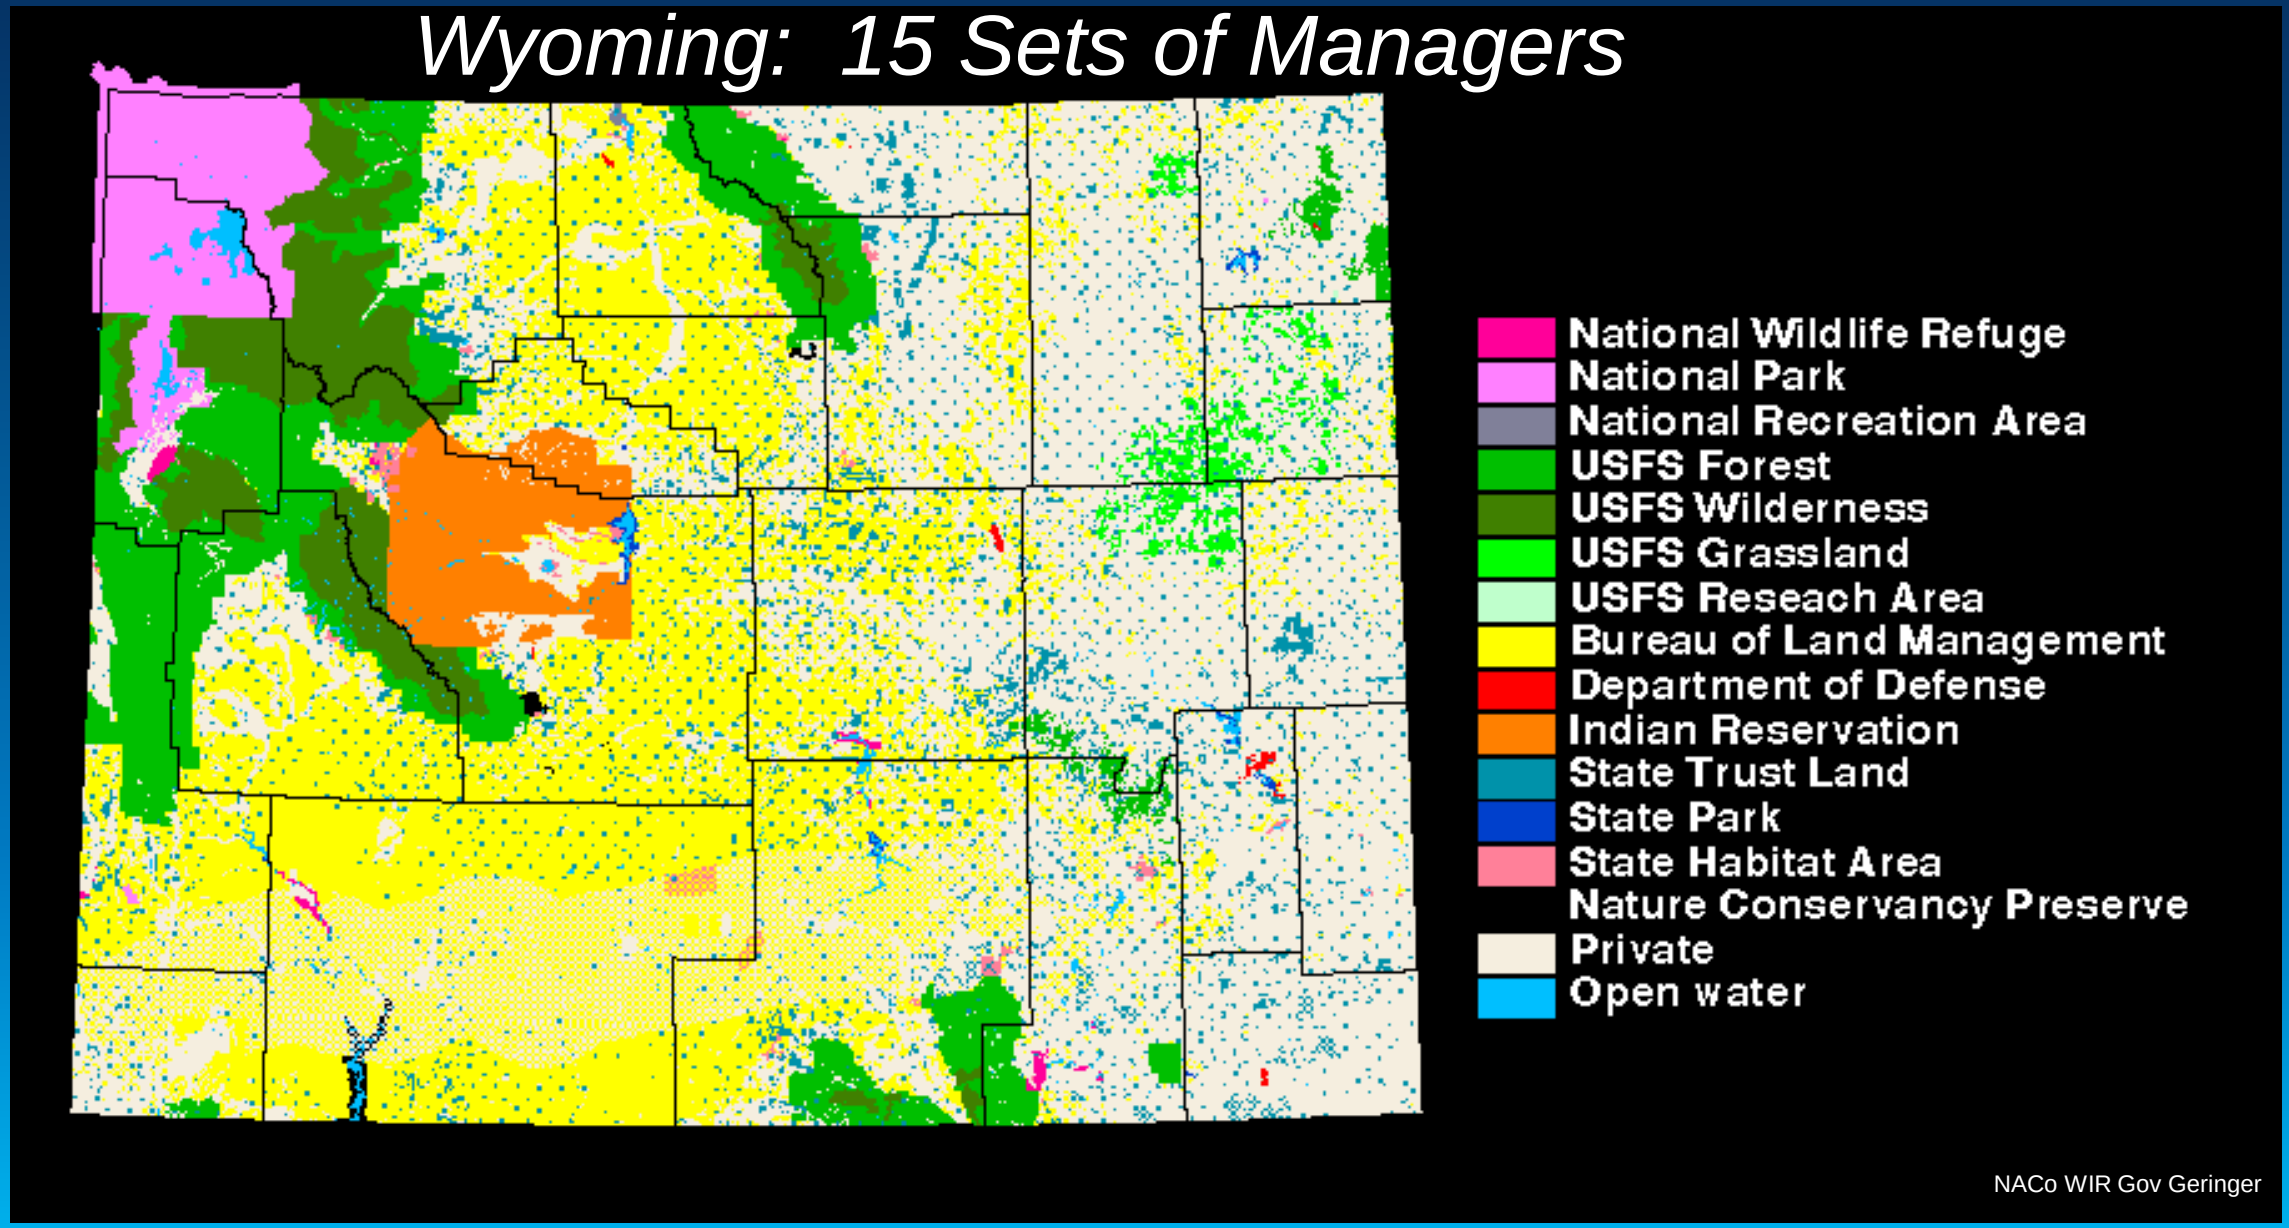
“We Don’t Have A Common Base Map”

Wyoming: 15 Sets of Managers



Each insisted on their own set of management procedures

What Was Missing?

- *The Big Picture*, a shared mission, partnership
- People who were willing to work together
- Common purpose to link our actions together for common good
- Discovering how spatial information and the infrastructure to implement it enabled integration …GIS is More than a Map
- Partnership inherently means Mutual Benefit

. . . Integrating Disciplines, Organizations and Activities

Kitchen Table –Leader as Convener

- Local, State and Federal agencies in Wyoming engaged in very few interactive meetings
- Federal Advisory Committee Act (FACA)
- SOLUTION: Invite folks to the ***Governor's Kitchen Table*** - every spring
- Began *data* sharing agreements that were precursor of an enterprise approach
- GIS was the key

NEPA: Friend or Foe

- National Environmental Policy Act - 1969
- Enacted "recognizing the profound impact of man's activity on the ***interrelations*** of all components of the natural environment"
- "It is the policy of the Federal Government, ***in cooperation with State and Local governments*** and other concerned public and private organizations… to create and maintain conditions under which man and nature can exist in productive harmony and fulfill the social, economic and other requirements of present and future generations." _Purpose Clause

http://www.nepa.gov/nepa/regs/nepa/nepaeqia.htm

NEPA Regs from Council on Environmental Quality

- From § 1501.6 *Cooperating agencies*.
- An agency may request the lead agency to designate it a **cooperating agency**.
- (a) The lead agency shall:
- (1) Request the participation of each cooperating agency in the NEPA process at the earliest possible time.

- ***It's Not The Act… It's the Actors…***

NEPA

- Cooperation and Collaboration
- States and Counties participate as Cooperating Agency
- Federal, state and private actions are needed that are
  - Comprehensive
  - Elicit better planning
  - Intergenerational in their beneficial effect
  - Strike a wholesome balance among the environment, the economy and our communities

What Can You Do?

- **Become a convener, trusted advisor**
- **Bring People Together To Share**
  - Experiences
  - Ideas
  - Information
  - Values
  - Approaches
- **Don't try to address everything in a single session**
- **Focus on Purpose, not just the Process**
  - **– Government too often only measures compliance, not outcomes**

'Collaborative Advocacy with other Western States Organizations

- **Western Interstate Region of the National Association of Counties**
- **Western Governors' Association**
- **Conference of Western Attorneys General**
- **Council of State Governments West**
- **Pacific NorthWest Economic Region**

President: Principles to Clarify and Strengthen the State-Federal Relationship

Congress: Collaborate with states on budget development

- > 50

0 200 mi
0 200 km

FEDERALLY LISTED or IMPERILED PLANT and ANIMAL SPECIES

The number of plant and animal species by county that are listed under the U.S. Endangered Species Act or are considered by NatureServe to be Imperiled (G1 or G2). The analysis is based on species occurrence data for approximately 4,400 plant, vertebrate animal, and invertebrate animal species from the Natural Heritage member programs, and includes only those populations believed to be extant. Counties with high numbers of species represent some of the highest priority areas for conservation action. The absence of data in any particular geographic area does not necessarily mean that species of concern are not present.

Welcome to Routt County's Open Data Catalog

Routt County GIS is pleased to introduce the new Open Data Catalog, which provides public access to all of Routt County's published open data.

Use the search bar at the top of the page to find data relating to topics of interest. As you browse through the different datasets, the extent of each will be displayed on the map. Once you find what you are looking for, select the dataset from the list to be able to view the data and get options for download. Alternatively, click the link below to browse a complete list of datasets.

Cheyenne Remembers: The Flood of 1985

Cheyenne Sanitation Pick-Up Zones

The Cheyenne and Laramie County Cooperative Geographic Information Systems (GIS) Program was established in 1993 to benefit the member agencies, government agencies, private industry, and the general public.

The Cheyenne City Council and Laramie County Commissioners adopted Resolutions in 1998 to establish the GIS Program as a means of organizing GIS efforts and coordinating the development of the Program.

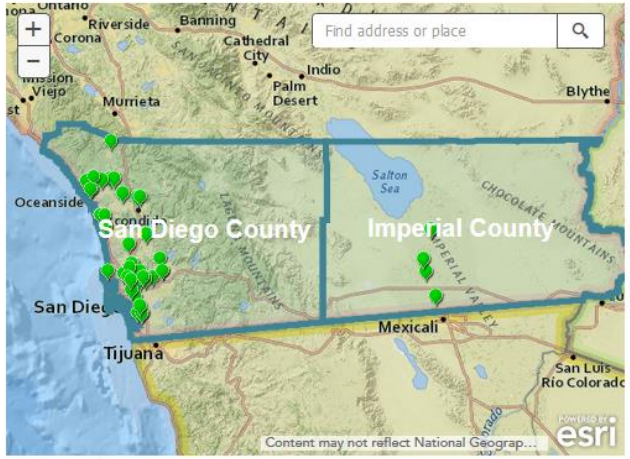
Resources

Taxpayers Resources

The Internal Revenue Services (IRS) offers free tax preparation help to people who generally make $53,000 or less, persons with disabilities, the elderly, and limited English speaking taxpayers. This program is known as the Volunteer Income Tax Assistance (VITA) program. In addition to the VITA program, the Tax Counseling for the Elderly (TCE) program is available to taxpayers 60 years of age and older and specialize in questions about pensions and retirement- related issues.

There are various VITA and TCE sites around San Diego and Imperial County. Some of these locations require appointments, so be sure to call them to get all the details. Explore the map below to find a VITA/TCE site near you.



view interactive map

For more information on the VITA and TCE program, visit the IRS website.

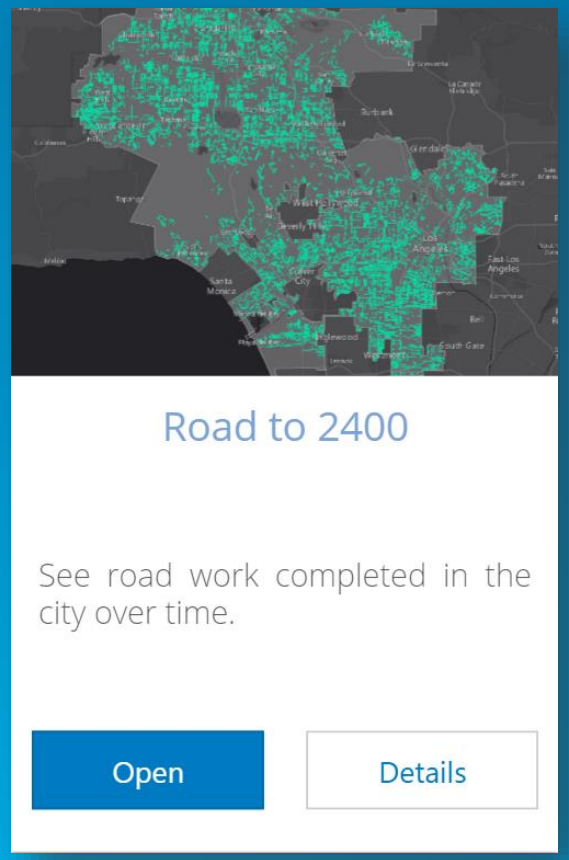
Storytelling is Key



- Goal: Pave 2400 miles of road
- No clear way to track progress
- Data stuck in DWP, DOT, CFO, DGS
- Location is common denominator to visualize
- Registered all needed data in Open Data
- Built a story map to tell the narrative
- Communicates to constituents clearly

- **Collaborative**
- **Open**

Gillette Regional Water Supply Story Map Powered by the City of Gillette's GIS Division

Gillette Regional Water Supply Project

Thank you!

Capital Facilities Tax Ends 18 Months Early!

Due to the continued growth and vibrancy of the economy in Gillette and Campbell County, the Capital Facilities Tax ended in the first quarter of 2015, 18 months earlier than projected. A big 'thank you' to everyone for shopping locally - without your continued support this would not have been possible. Remember, we're all in this together.

Leveraging the Value of Shared Data

VOICES

“Business, government and citizens, frustrated by years of litigation and stalemate, have begun to turn to the *common good*, sometimes out of desperation, but more frequently out of hope.

__ Former EPA Director Bill Ruckelshaus

Laws and institutions must go hand in hand with the progress of the human mind. As that becomes more developed, more enlightened, as new discoveries are made, new truth disclosed, and the manners and opinions change with the changes of circumstances, institutions must advance also and keep pace with the times.

__Thomas Jefferson
