ABOUT THE BOOK PROJECT

With county government policymakers and practitioners now facing the realities of generative AI, this book was developed with three main objectives:

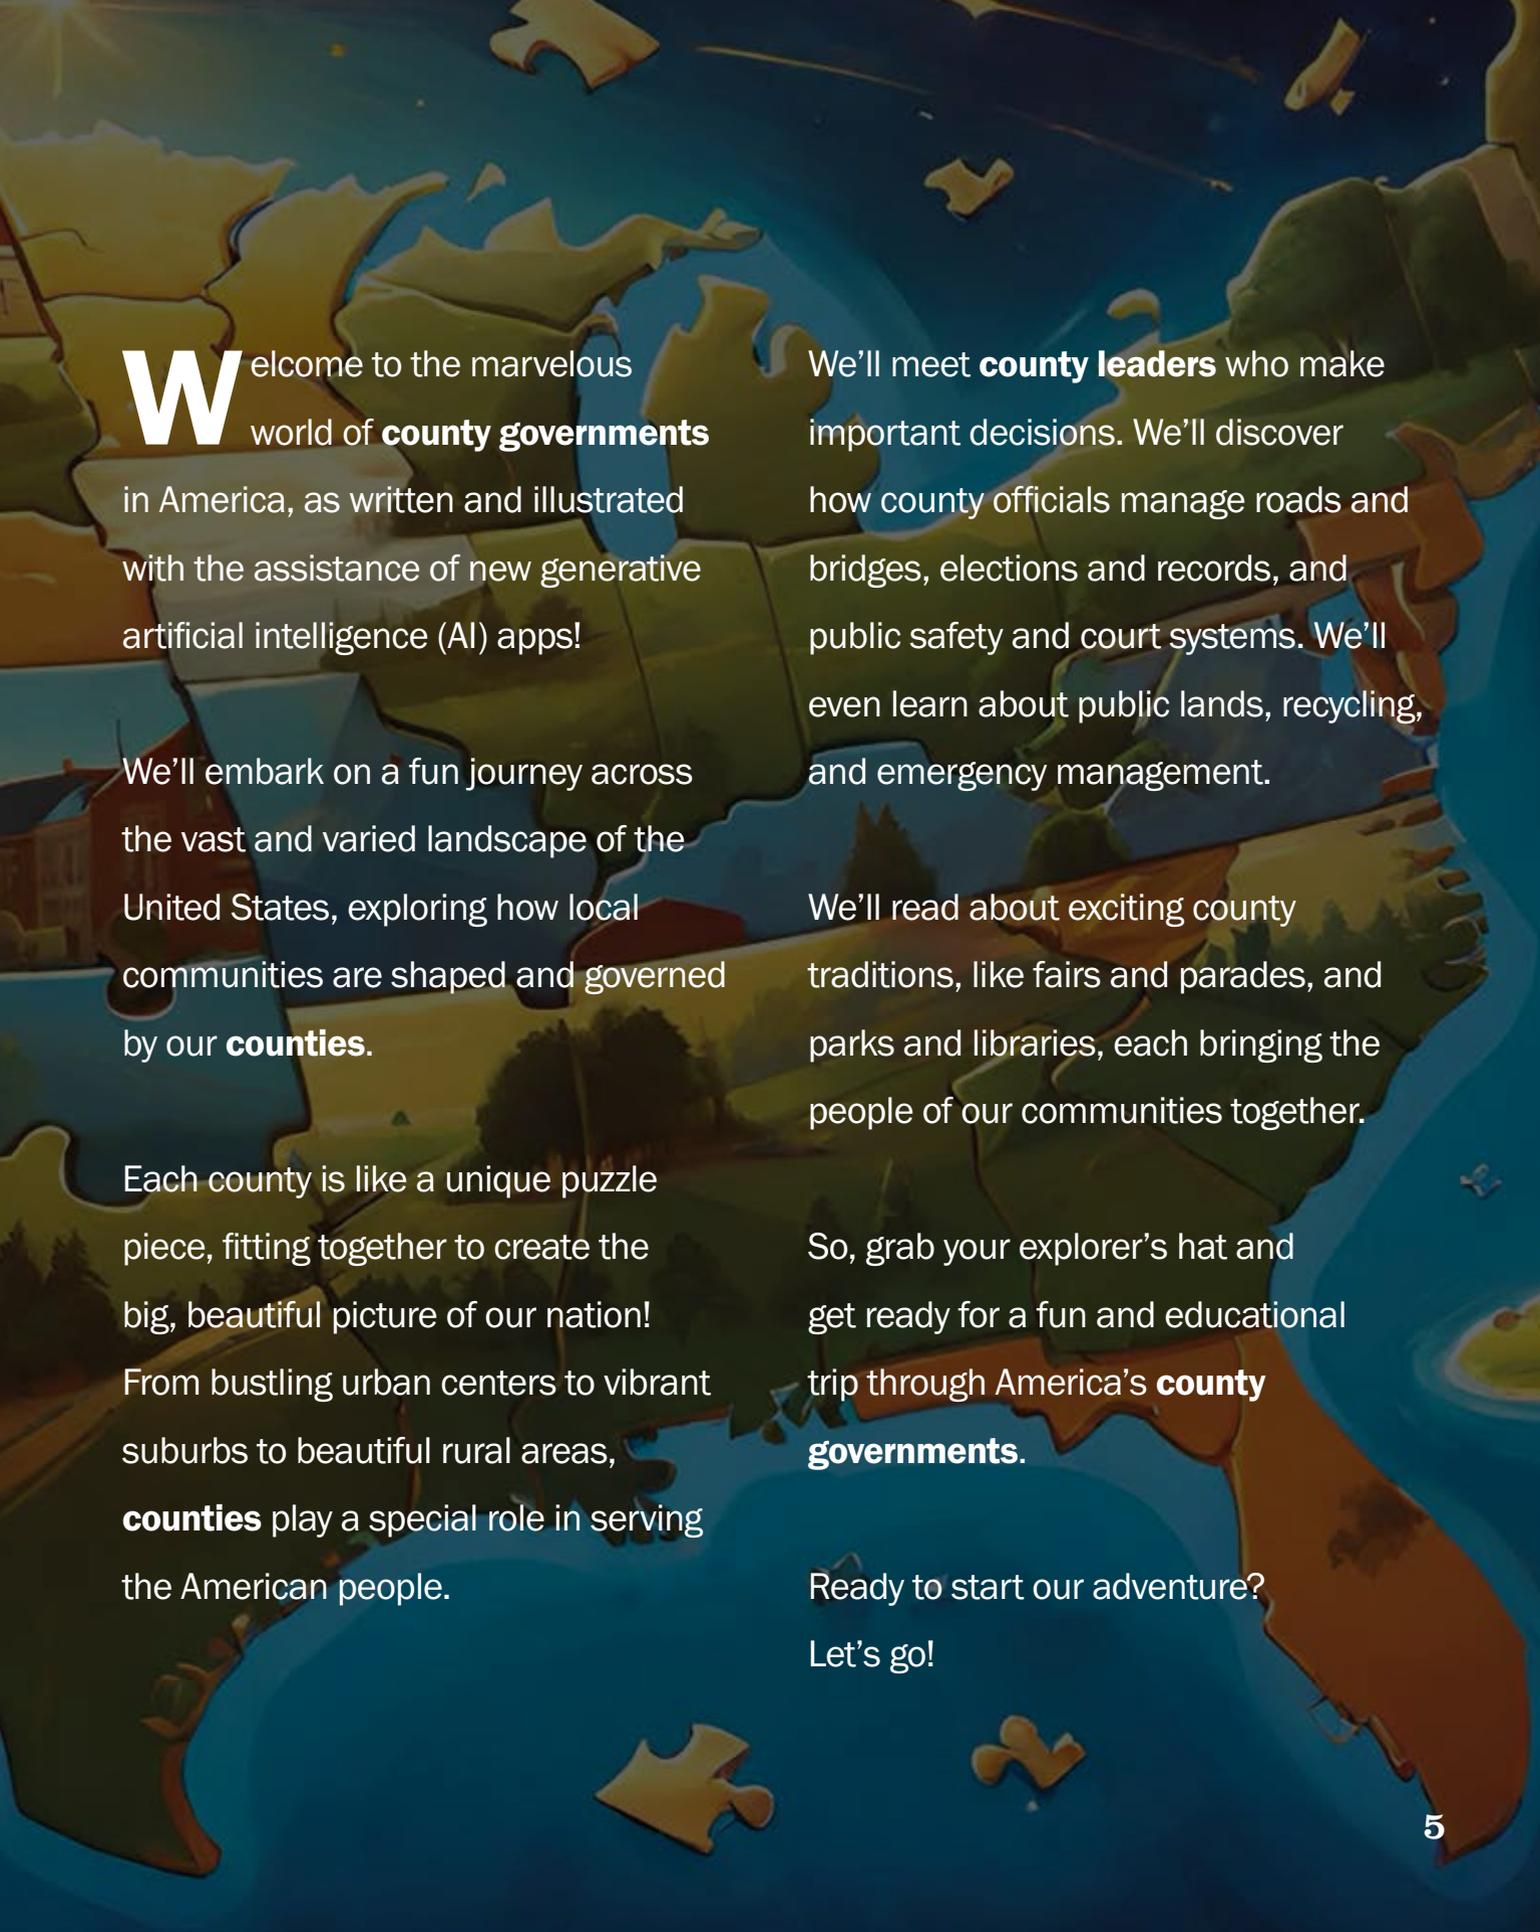

- (1) Showcase the remarkable capabilities and intricate nature of contemporary AI technologies,
- (2) Stimulate collaborative policy discussions among intergovernmental partners regarding the near limitless applications within the public sector, taking into account the possible inherent biases in AI systems, and
- (3) Inspire the young people of America to explore the exciting and meaningful roles and responsibilities of county government officials.

GLOSSARY OF MOST COMMON COUNTY ELECTED OFFICIALS

Like the federal government, America's 3,069 county governments are designed with "checks and balances" of authorities, mandates, and functions across executive, legislative, and judicial duties. These responsibilities are exercised within the framework of state and federal constitutional and statutory law.

County boards, led by nearly 18,000 elected officials nationally, generally exercise executive and legislative powers, including oversight of the county budget, policies and general operations. In more than 700 counties, the executive function is led or shared by a chief executive who is elected countywide.

Nationwide, more than 18,600 independently elected officials, often referred to as "constitutional" or "row" officers, are also elected for specific county functions.

As outlined in the book, below is a sample of the most common elected positions in county government:
