What is Cybersecurity about in 2026?

- AI?
- Phishing?
- Vishing?
- MFA?
- Passwords/Passphrases?
- Ransomware?
- Business email Compromise?

What is Cybersecurity about in 2026?

Yes, but.....

Stories from the Good Guys

- Free bottles of wine, anyone?
- People in Uniform
- Other people in Uniform

So... How do we keep our People Safe - and therefore our Organization?

Stay abreast of emerging threats:

- What was attempted yesterday, will be different today, and more advanced tomorrow.
- Names stay the same, but the threat is evolving*:

PHISHING & SYSTEM WEAKNESSES

Exploiting human trust, urgency.

MFA? There are ways to abuse this and work around it.

SOCIAL ENGINEERING

Free wine – if it's free...

Deception tactics are evolving.

TARGETED & PERSONALIZED

Close, but not the same:
Your site, your wifi, you email.

Evolution from mass efforts to targeted individuals.

What can you do?

TECH DEFENSES: DO THEM WELL!

Firewalls

Encryption

Least privilege access

Backups

Virus protection

Logs, monitoring,
penetration testing, etc...

Yet criminals will
constantly seek and
find vulnerabilities

IT IS ABOUT PEOPLE!

Culture

Train

Constant

Thank you!

Peter Forsgren
