FOOTWEAR**  
ASSOCIATION

# LOOKING TO ORDER FACE MASKS? These companies can help.

During the past few months, companies have ramped up their ability to produce face masks and coverings in response to the COVID-19 pandemic. As we get back to work, face masks will be essential to prevent further transmission of the virus. According to the [U.S. Centers for Disease Control](#), cloth face coverings are most likely to reduce the spread of COVID-19 when they are *widely used* by people in public settings. The CDC notes further that the spread of COVID-19 can be reduced when cloth face coverings are used along with other [preventive measures](#), including [social distancing](#), frequent handwashing, and cleaning and disinfecting frequently touched surfaces.

AAFA has polled its membership to identify companies with the ability to produce face masks, for both small and large orders, both medical and non-medical, to help businesses and communities provide masks to their stakeholders.

If your company has any of the following capabilities, please send AAFA the following information:

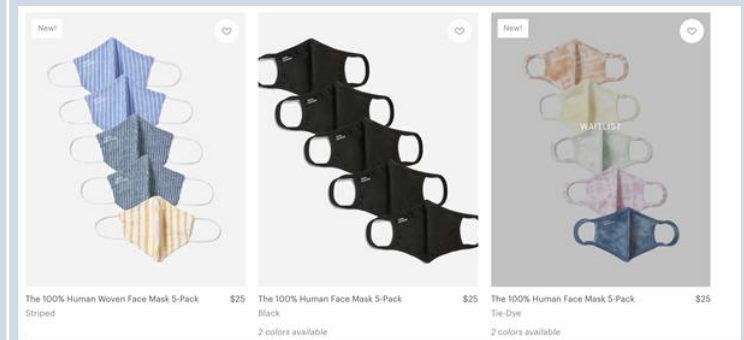

- **Brief description of types of cloth face coverings available:** It is not necessary to list every SKU, but highlight the major types, size, etc.
- **Quantity:** Is your company selling singles, small batches, and/or bulk orders bulk orders?
- **Contact:** Is there a direct web link and/or specific email address?
