

TestIT

Find us in the app store!

Accurate connectivity data is the foundation for investments in broadband infrastructure. Connectivity data provided to the Federal Communications Commission is often inaccurate and inflated – leaving many rural communities overlooked and disconnected.

“TestIT” is a free iOS/Android mobile app designed by Measurement Labs (MLabs) to collect broadband speeds across the country from app users. With the press of a single button, users are able to test their broadband speed from anywhere.

No personal information will be collected through this mobile app.

Your help identifying gaps in our nation’s broadband coverage is critical to ensuring federal broadband funds are directed to our most unserved and underserved communities. We hope you will help shed light on this critically important issue and encourage your friends, family and constituents to join in the efforts as well!

For more info,
