Action Center

Each step on the Action Cycle is a critical piece of making communities healthier. There is a guide for each step that describes key activities within each step and provides suggested tools, resources, and additional reading. You can start at Assess or enter the cycle at any step. Work Together and Communicate sit outside because they are needed throughout the Cycle. At the core of the Action Cycle are people from all walks of life because we know we can make our communities healthier if we all get involved.

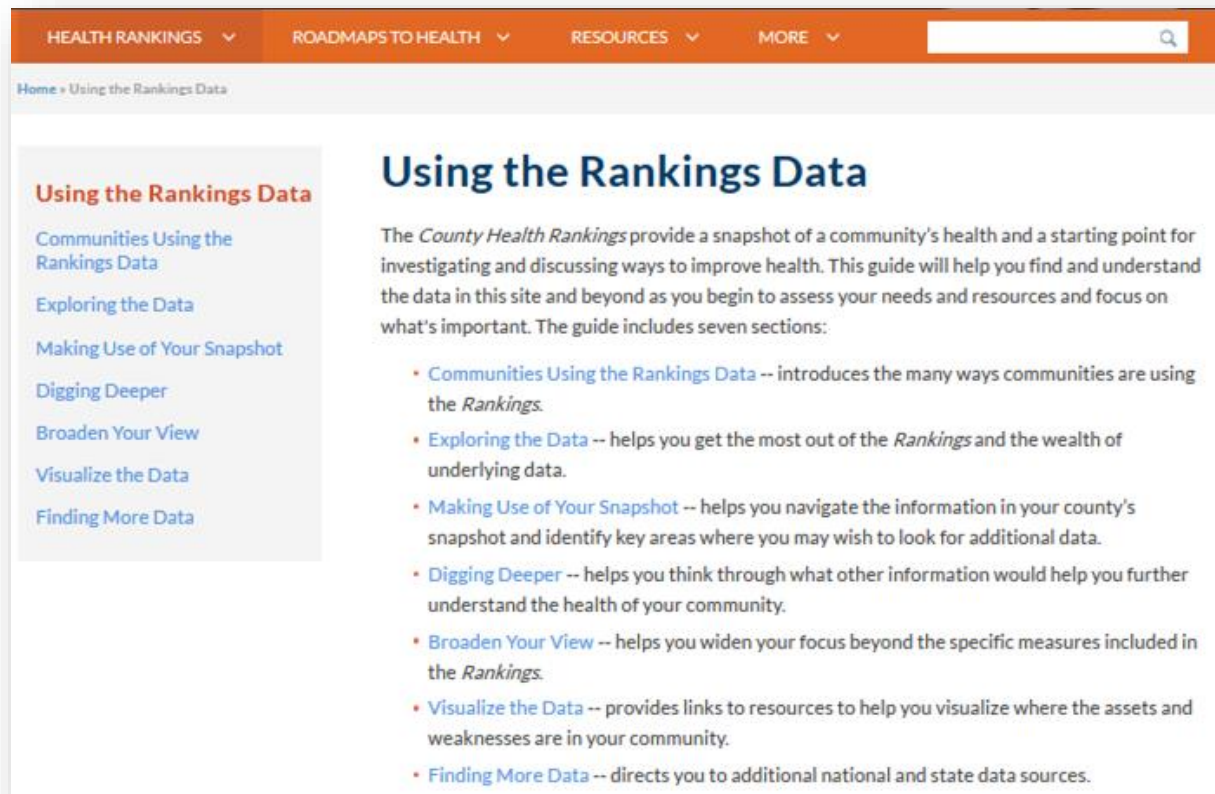

Roadmaps to Health Coaching is available to provide local leaders with direct support in using Action Center tools and guidance to advance health.

Select an Action Step or community member to learn more.

Act on What's Important

Take action—ensure that selected policies and programs are adopted and implemented in order to achieve intended results.

Who to Involve

People from business, healthcare, public health, education, government officials, elected boards, advocacy groups, faith-based organizations, not-for-profits, foundations or other investors, and anyone who cares about or is affected by the many factors that influence health in your community.

As you engage in this step, keep in mind the population with the greatest health disparities in your community -- those who are most vulnerable and are experiencing the worst conditions for good health. Involving them throughout your health improvement process will ensure that their voices and needs are heard and addressed.

Activities

Clearly define your goal

Identify key decision makers, allies, and opponents

Develop a strategy to take action

Identify resources to support your activities

Build political will

Advocate for change

Maintain the momentum

Sustain the work

ACTION CENTER ACTIVITY PAGE

Develop a strategy to take action

MENU

Action planning will move you from your broad goal to specific, measurable, achievable, realistic, time-determined (SMART) objectives, and then even more specific tactics or action steps. Effective action plans include advocacy planning to think through how to influence key decision makers. They also designate accountability for leaders, teams, timelines, and budgets.

The first step is to create a clear strategy that will help focus and guide your efforts. Ideally, this strategy is the result of collaborative input from those who will carry out the plan. [How to Create a Strategy Chart](#) provides a step-by-step process for developing a "campaign roadmap" that can help a group decide what steps to take and when. The example is focused on youth engagement in policy work and can be adapted for any issue or audience. The [Advocacy Progress Planner](#) is an online campaign planning tool that guides you through identifying your long-term goal, targeting your audience, selecting specific strategies and tactics, and identifying benchmarks to evaluate progress along the way.

Once you've developed your overall strategy, [The Action Plan Worksheet](#), [Developing a Plan for Advocacy](#), [How to Create SMART Goals Using a Tree Diagram](#) and [SMART Tree Diagram Template](#) are all tools to help you build your specific action plan. For full commitment, it's usually best to involve people in developing the action plans they will be responsible for implementing.

A communication strategy is another key part of taking action. The [Smart Chart 3.0](#), from Spitfire Strategies, can help you create your communications strategy.

Enhance/expand school-based physical education

Evidence Rating

Scientifically Supported

Health Factors

Diet and Exercise

Decision Makers

Philanthropy and Investors
Educators
Government

Expanding and enhancing school-based physical education (PE) classes can include adding new PE classes, lengthening existing PE classes, or increasing physical activity during PE class. Local schools can implement policies or state governments can set standards to expand or enhance school-based PE.

Expected Beneficial Outcomes

- Increased physical activity
- Improved physical fitness

Evidence of Effectiveness

There is strong evidence that enhancing school-based physical education increases physical activity and physical fitness among school-aged children (CG-Physical activity, Demetriou 2012, NBER-Cawley 2012, Story 2009). Enhancing/expanding PE classes as part of a multicomponent school-based obesity prevention intervention has also been shown to increase physical activity and improve health (Nixon 2012, Cochrane-Waters 2011, Cochrane-Dobbins 2009).

School-based physical education (PE) classes have been shown to lower BMI and reduce the likelihood

Long Beach, CA

Knox County in numbers

CANCER

HEART DISEASE

OBESITY

DIABETES

- Cancer (all types) is the leading cause of death in Knox County 2015 (1).
- 10.5% of adults reported having being diagnosed with diabetes (2)
- 37% of respondents chose diabetes as important health problem among Knox County adults (3)
- Diseases of the heart are the second leading cause of death in Knox County in 2015 (1).
- 33% of adult reported they have hypertension (2)
- 45.3% of middle school students trying to lose weight (4)
- 69% of adult reported being overweight or obese (5)

Most of our issues are caused by physical inactivity

Only 23% of individuals live within one-half mile of a park in Knox County(6)

Six in 10 prefer a neighborhood featuring a mix of houses, shops and services within an easy walk.(7)

46.2% of adults with less than a high school education reported no leisure time activity in the past 30 days(2)

What is our prescription for health?

Healthy communities equal healthy economies.

DATA

- **Make it understandable.** Data is crucial to make your case, but you need to know how to communicate it.
- **Make it personal.** How do these facts affect people's lives? What does it mean for them and their families?
- **Make relational** Understand what they care the most about.
- **Always have an ASK.**

Knox County in numbers

BEFORE THE PROJECTIONS

- Help them bring the memories back. "I remember when I used to walk to school..."
- Current implications. "My neighborhood is too dangerous to walk..."
- Discuss root causes.
- Always have an ASK.

Knox County in numbers

Population projections

Millennials (101,432) + Baby Boomers (116,472) = 48% population

Millennials prefer walkable, connected, active and vibrant places.

Many baby boomers are downsizing and moving to walkable places.

Today

1 in 6 people are seniors

In 2040

1 in 4 people will be seniors

By 2040 we'll have around 150,000 more people.
How are our plans for transportation, housing and jobs?

Healthy communities equal healthy economies.
Advocate, support and vote to build walkable, connected, active communities

Millennials 3.0

Where they want to live

- Vibrant and diverse places
- Walkable places
- Mixed-use development
- Shorter commutes
- Transportation alternatives to driving

What is available in the market

- Single use development
- Disconnected land use patterns
- All destinations must be reached by car
- Car-dependent communities
- Cookie cutter housing options
- Big box shopping centers

Healthy communities equal healthy economies. Advocate, support and vote to build walkable, connected, active communities.

Walkable communities

Why are they good for you?

-  Reduce transportation costs which can be invested in the local economy
-  Encourage people to be more physically active therefore healthier
-  Increase safety with more people and eyes on the streets
-  Connect and engage community members
-  People can walk and bike for daily errands
-  Reduce commute times
-  Are designed for people

Healthy communities equal healthy economies. Advocate, support and vote to build walkable, connected, active communities.

Drivable suburbia

What is wrong with it?

-  Keeps communities isolated and disconnected
-  Designed around cars, not people
-  People depend on cars for all their errands
-  Difficult for people to be physically active
-  Increases families' transportation cost
-  Increases commute times

Children, youth, the elderly and disable are forced to be homebound or depend on others to get around

Healthy communities equal healthy economies. Advocate, support and vote to build walkable, connected, active communities

Source: Ian Lodiwood, Walkable Environments (and the Seven Attributes of Walkability)

Walkability Checklist

- Is there a reason to walk?
- Does it feel safe to walk?
- Is it comfortable to walk?

- Is it interesting to walk?
- Is it engaging?
- Is it accessible and safe?

- Is it connected?
- Is it vibrant?
- Is it easy to find your way?

Healthy communities equal healthy economies.
Advocate, support and vote to build walkable,
connected, active communities.

BEYOND THE SIDEWALKS

THE BIG FRAME

THE TECHNICAL JARGON

You're invited to a **free** community event:

Better Streets, Better Places

At a time when everyone's talking about creating places that are vibrant and successful, how do we make sure that our streets support those goals?

What: Come learn about and discuss how to create a more walkable, bikeable and transit-friendly community.

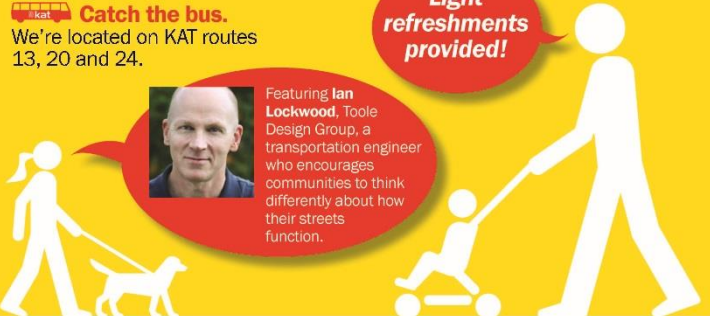

When: July 27; Doors open 5:30 p.m.; Program at 6 p.m.

Where: Knox County Health Department Auditorium, 140 Dameron Ave.

 **Catch the bus.**
We're located on KAT routes 13, 20 and 24.

Light refreshments provided!

Featuring **Ian Lockwood**, Toole Design Group, a transportation engineer who encourages communities to think differently about how their streets function.

And...

Social time and food truck after the event at Schulz Bräu, 126 Bernard Ave., just around the corner from the auditorium.

NEXT STEPS

- **Sustainability.** Continue the great work.
- **Strength partnerships.** Bring new and innovative partners to the table.
- **Engage your community.** Bring people together to learn and discuss about relevant issues in your community.
- **Bring elected officials to the table.** More education and engagement is always good.
- **Always have an ASK.**

This has been a presentation of

Health Department**

Every Person, A Healthy Person

Tuolumne County Behavioral Health SOAR Housing Project 2016

Initiating the Development of a Healthier Communities
through

Linking Decarceration, Housing and Benefit
Opportunities

Through partnerships with Rural County Services and
Communities

Appreciation, Partnerships and Acknowledgments

The Tuolumne County Program is a partnership of a Private Corporation, a Statewide non-profit organization, a community based organization and a County Behavioral Health Department.

- **Centene Foundation for Quality Healthcare:**

Centene Corporation is a multi-national healthcare enterprise that provides a portfolio of services to government-sponsored healthcare programs, including programs under Medicaid, focusing on under-insured and uninsured individuals. The Company operates local health plans and offers a range of health insurance solutions.

- **California Institute for Behavioral Health Solutions:**

A non-profit agency that helps health professionals, agencies and funders improve the lives of people with mental health and substance use challenges through policy, training, evaluation, technical assistance, and research.

And

- **Amador Tuolumne Community Action Agency**

Community Action programs are an outcome of the Economic Opportunity Act of 1964, which symbolized an era of concern and commitment by the United States government to its impoverished citizens – ATCAA was established in 1981 through a JPA between two counties as neither could reach the population standards to qualify.

- **Tuolumne County Behavioral Health Department**

A county operated mental health and substance use program serving persons with severe mental illness and substance use disorders.

Tuolumne County Demographic Snapshot

- * **California - Rural, farmland to mountains – geographically diverse.**
- * **Population estimated in 2015 = 53,709**
- * **Persons under 18 comprise approximately 21% of the population.**
- * **Persons over 65 are approximately 24% of the population.**
- * **Ethnicity – not diverse - Caucasian representation is 91%.**

The Journey to a Home

- * Tuolumne County established the first Housing project as developer, owner and operator and duplicated in 2nd housing plan between 2010 and 2012.
- * A supportive development of a 24 hour support system and safety center (CAIP – Crisis, Access, Intervention Program) that included:
 - * Walk in clinic 24 hours a day/365 days a year
 - * Follow-up contact coordination with primary teams
- * Strengthened and developed other supports:
 - * Immediate assignment of an intensive case management support with full array of service including peer specialist
 - * Engage Social Services for development of an in home support system for person returning home with skill or physical care limitations
 - * **And critical to success:** Two peer drop-in centers with varying opportunities and resources.

Recovery Is Happening!

- * A return to the community and services was proving successful and positive for persons who were previously in long term mental health institutions.
- * A 35% reduction in high cost, restrictive placements was achieved
- * The community, including neighborhoods, law enforcement and social services, found that the concerns of community based housing were unfounded and residents did not require rehospitalization or placement.

What Was and Is Now Happening?

California is making dramatic changes toward decarceration through such legislative actions as AB109 and Proposition 47.

- * Respective to these two actions, persons who were previously imprisoned returned to Tuolumne and some offences were reduced to effectively eliminate actual incarceration.
- * The local economy was slow in realizing recovery – limited job opportunity
- * Affordable housing highly competitive or non-existent for low income.
- * Drug abuse and co-occurring mental illness, crisis of hope and frustration reflected in consumers and community related to the decarceration efforts.

What are other mitigating factors?

Homelessness is an under-recognized and growing rural issue.

- * Tuolumne County's point in time census in Jan of 2016 showed 166 unsheltered homeless individuals – and 98 sheltered homeless.
- * Various statistics nationally vary, but overall the conclusion has been that approximately 1/3 of homeless persons are likely to suffer from a severe mental illness. This would equate to around 80 persons in Tuolumne County if the figures remain true.
- * This is not inclusive of “couch surfers” – often a younger population of which last count was 110 in 2013
- * One last thing: the #1 characteristic of rural homeless is -- *THEY HIDE*. As per the the local community organization, “We’re probably getting less than 30% of the actual total of homeless persons in Tuolumne County.”

The Shift: Responding to New Challenges

Despite partnerships with Probation and Law Enforcement the barriers existed:

Persons coming from incarcerated settings lacked necessary benefits for which they qualified.

Homelessness and failure to access treatment was almost predictable.

Re-arrest, psychiatric hospitalization, presentation in emergency services and re-engagement in substance abuse was becoming a model of self-management.

What We Have and What We Don't

There "R" many

When Considering the Economy of Scale:

The "R's" We Know We Have: (and use)

- * Resiliancy
- * Relationships
- * Recovery Commitment

The "R's" We Don't Have:

- * Resource Adequacy
(funding and service)
- * Redundant Support
Systems

(and need)

New Steps

- * Two previous supportive housing options were successful specifically for persons who were in extended locked placements due to their mental illness and difficulty of self-management in the community.
- * Addressing those persons returning to the community from incarcerated settings and living homeless was a natural and valuable consideration to continue the efforts toward a healthy and safe community for supporting persons with mental illness at a local level.
- * 2015 – Joint application with TCBH, ATCAA and CIBHS for Centene rural healthcare grant to provide SOAR benefit strategy to persons with history of incarceration and mental illness including transitional housing owned by ATCAA and case managed through BH with Probation support – up to 7 persons at a time.

Thinking Ahead Before You Start

- * In creating the partnership and seeking the funding we assured this was a service that would be utilized and perceived as a need by stakeholders – organizations and those who would benefit.
- * In planning for application we first determined if there was a way to sustain the project after the 2 years that funding was available – this was perhaps the most important to the decision – if we were to create a successful program, we couldn't start, then withdraw. SUSTAINABILITY is key to community trust, value and long term establishment toward best practice.

What is Working

- * Persons are being interviewed and housed in community housing
- * Though some persons are declining the housing, they are increasingly accepting support services to apply for benefits using the SOAR model of Social Security benefits application
- * Teaming with peer specialist support services, use of peer community centers and responding in less structured ways is well received.

Paths to Peer Support Services

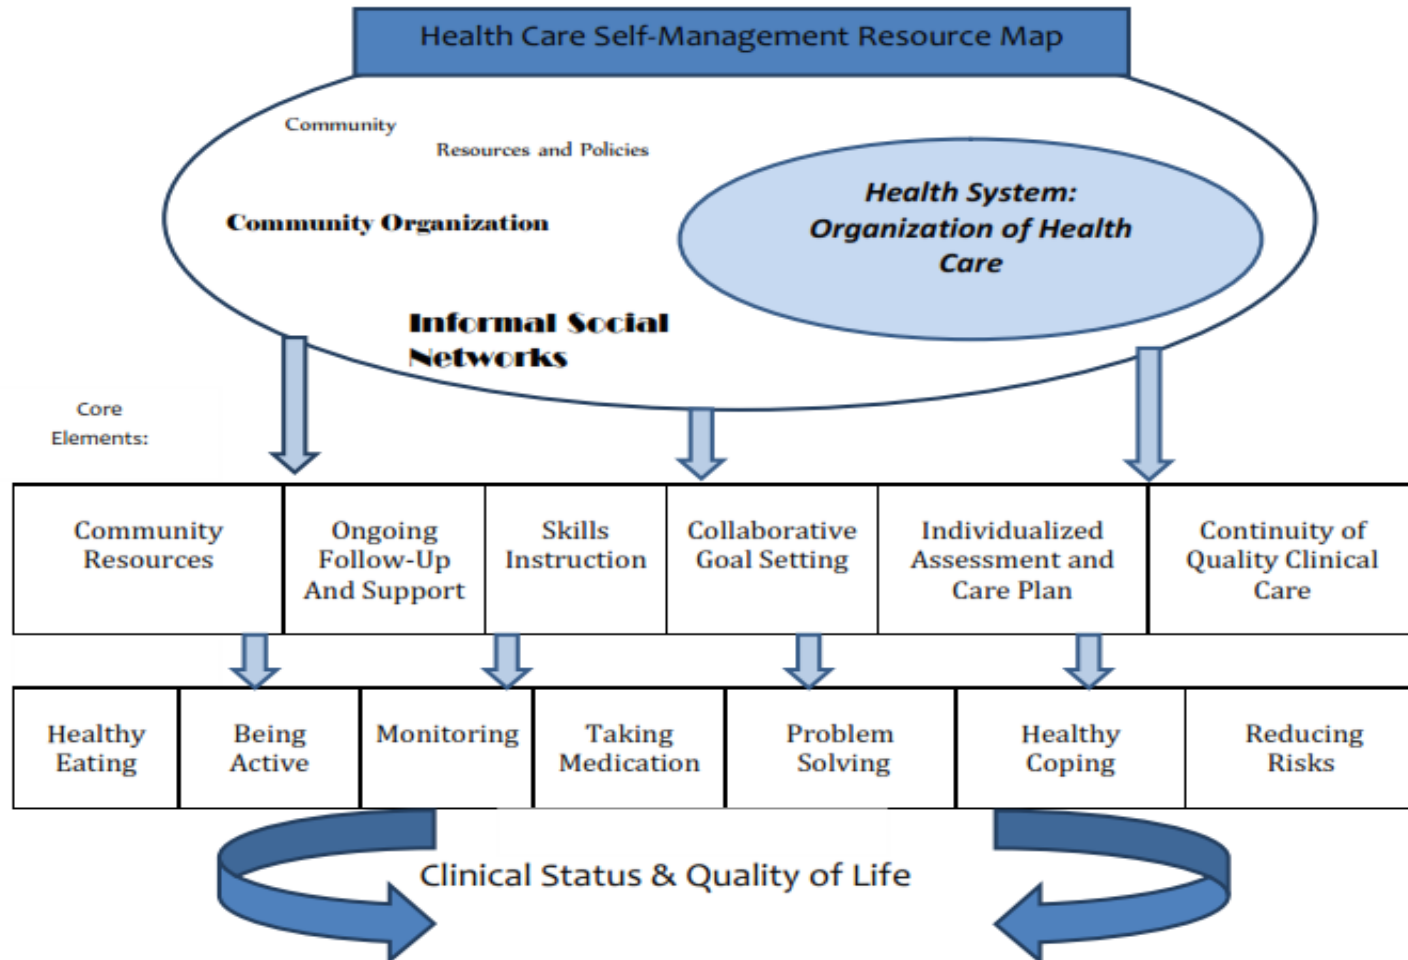

Enrichment Center

- Weekly peer lead support groups
- Computer/printer access and education for WRAP, Network of Care, Patient Portal Access
- Showers, laundry, socialization
- Benefits Specialist provides Outreach & Engagement services and supports SOAR application process
- Garden collaboration with Community Organization and Master Gardeners
- Served an average of 83 unduplicated peers each quarter in FY13/14

David Lambert Community Center

- Homeless drop-in peer and volunteer supports and outreach
- Referrals to Benefits Specialist and to BH
- Served 111 unduplicated peers each quarter

Draw on All Resources

Despite the Best Planning

**You can do everything that you know
To do things right
..... And things can still go wrong.**

The Trauma and Lessons of New Programs (that may become promising practice)

Persons who have been incarcerated come from a different culture and expectation than many of those who had originally been diverted in long term mental health treatment.

This is Where the “R’s” Happen and What We All Must Do to be Healthy Communities

- * Stay the course but learn from events – this requires resiliency in our staff, programs and participants.
- * Support relationships with participants, partners and community – acknowledge the challenge and difficulty
- * Remember recovery happens – but in different ways for everyone.
- * RISK – This may be the highest risk population we will work with, modify the plan to increase awareness of this feature.

Use the Tools to Adapt and Reinvest: Re-evaluate and Implement

A Final Thank You

This territory does not seem well charted for rural communities and we so appreciate our partners and the opportunity to share with this audience.

A healthy community is an environment that accepts the challenges, continues the investment in planning and working together and recognizes all the persons who interact in the environment.

I thank all the staff and commitment that I represent today and honor the lives that are impacted through our efforts.
