

Data-Driven Justice Incarceration Report

Identifying Super Utilizers with Incarceration and
Prescription Monitoring Data

Presented by:

David Speights, PhD
Chief Data Scientist, Appriss
dspeights@appriss.com

July 2016

Overview and Objectives

Key Objective: Data-driven approach to Identifying Super Utilizers

Objectives

- Identify super utilizers using analytical methods applied to key data sources

Defining Super Utilizers

- Identify individuals on the top end of the spectrum in key areas

Overuse of Law Enforcement

Excessive Calls for Service

Excessive Alcohol/ Drug Arrests

Excessive substance related arrests

Overuse of Health Resources

Excessive ER Visits
Mental Health Facilities

Overuse of Jails

Excessive Arrests

Homeless

Arrests which indicate high likelihood of being homeless

Overuse of Prescription Narcotics

High Abuse Risk

Appriss has some or all of the information in this category. Appriss monitors arrest records for 48 states and prescription monitoring data for 24 states

Other data sources which would help in identifying super utilizers

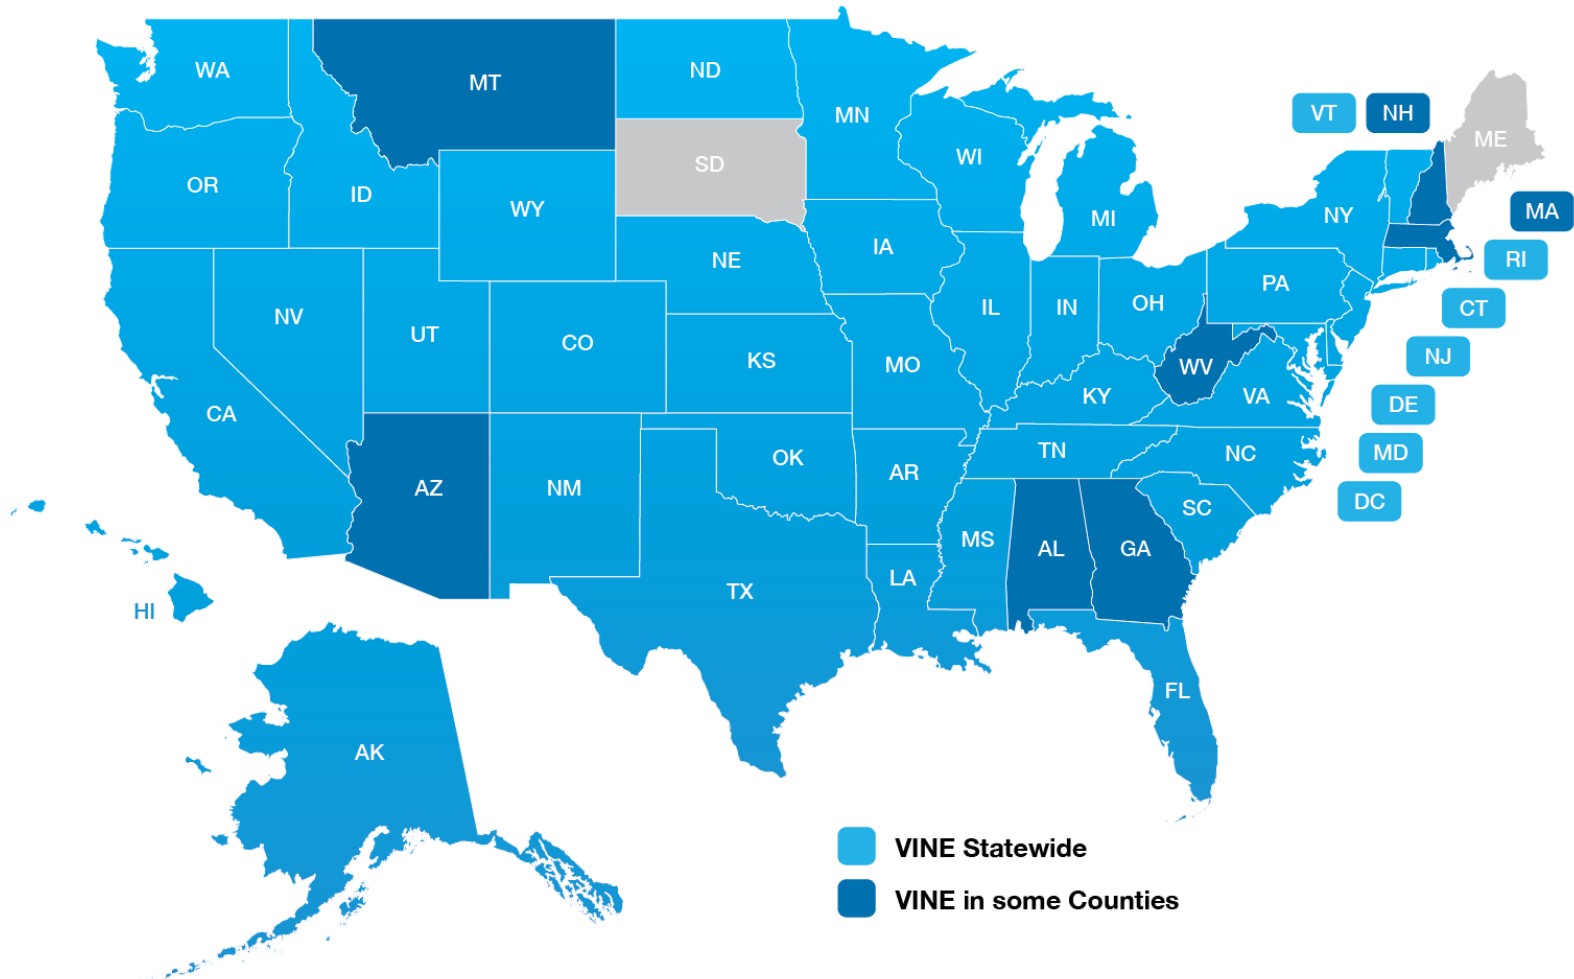

Appriss Offender Data Overview

Appriss Offender Data Coverage

Appriss collects more than 9 million incarceration records annually (48 states)

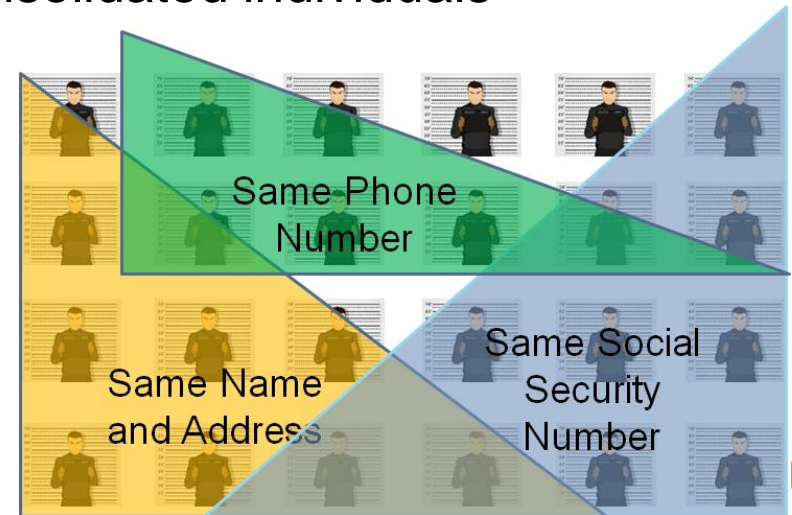

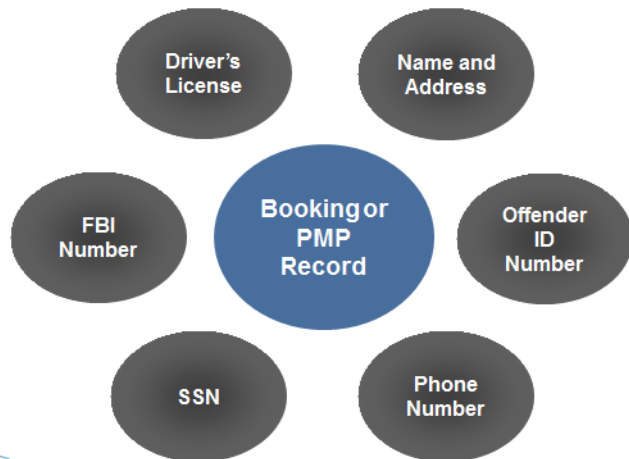

- Collects data from over 2,000 facilities

** Appriss has limited rights to offender data from some states*

Analysis of 2015 Incarcerations

- 9,812,804 bookings from 2015 were used to analyze arrest patterns, repeated bookings and target offenses (described later) from 48 states.
- Appriss' proprietary consolidation logic was used to identify arrest records made on the same individual, but with only some or partially matching characteristics:
 - Key identifiers: Name and address, Driver's license, SSN, phone number, FBI Number, Offender ID number, date of birth
 - Represents 6,881,072 unique consolidated individuals

Additional Details of the Data Used in this Analysis

- Key areas were analyzed
 - Repeated bookings
 - Repeated bookings of target offenses
 - Multiple addresses (or homeless listed as address)
 - Hospital releases

- Data adjustments
 - If an individual is booked to serve out a scheduled term over many bookings which are identifiable (e.g. every weekend for two months they serve out the time), we consolidate those records into a single record.
 - If an individual is booked into two agencies at the same time (which can happen when one agency uses another agency to help accommodate some inmates), we only count that as a single incarceration.

Target Charges of Interest (2015)

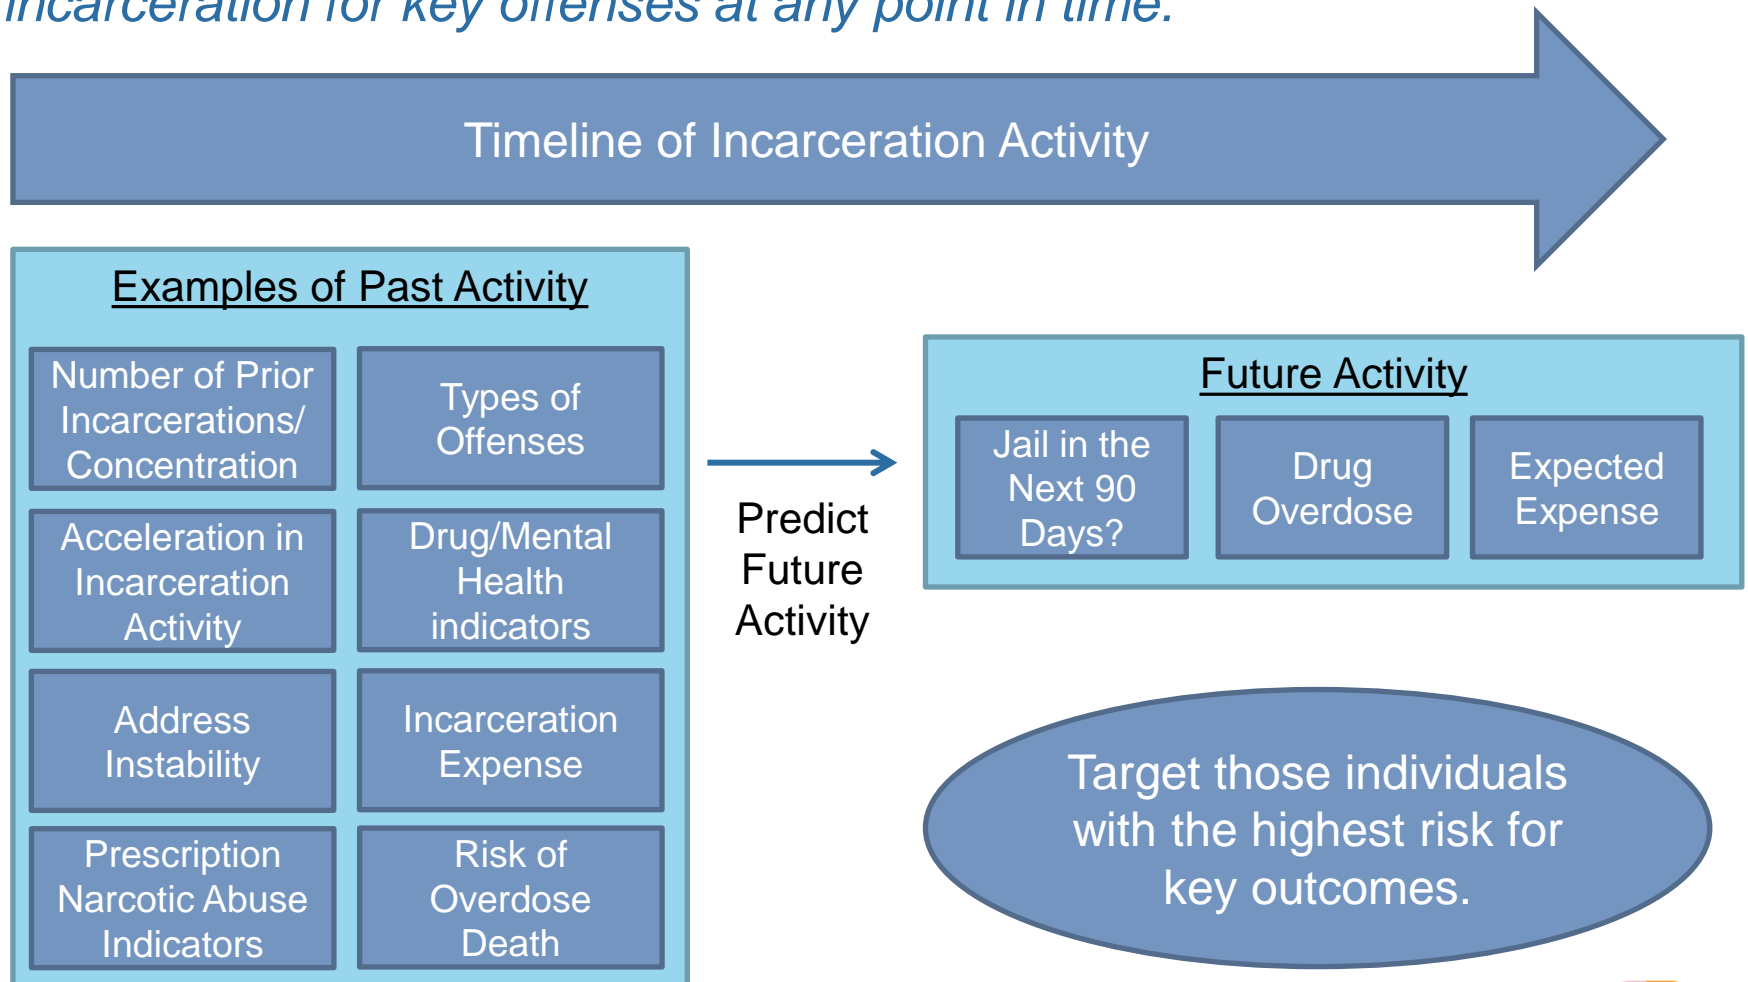

Appriss found 2.8 Million arrests for super-utilizer-type offenses in 2015. Super utilizers will have arrests across multiple target categories in a short period of time.

Target Charge	Number of Records in 2015
POSSESSION OF CONTROLLED SUBSTANCE	1,326,610
DRIVING UNDER INFLUENCE	643,318
PUBLIC INTOXICATION	196,807
DISTRIBUTION OF CONTROLLED SUBSTANCE	179,096
TRESPASSING	141,705
DISORDERLY CONDUCT	133,246
MINOR IN POSSESSION	31,505
OPEN CONTAINER	30,721
CITY ORDINANCE	28,888
DISTURBING THE PEACE	22,910
REFUSAL TO SUBMIT BREATHALYZER	8,220
LOITERING	5,871
INDECENT EXPOSURE	5,861
VAGRANCY	1,050
Total	2,755,808

* Target offenses were chosen which are associated with substance abuse or homelessness

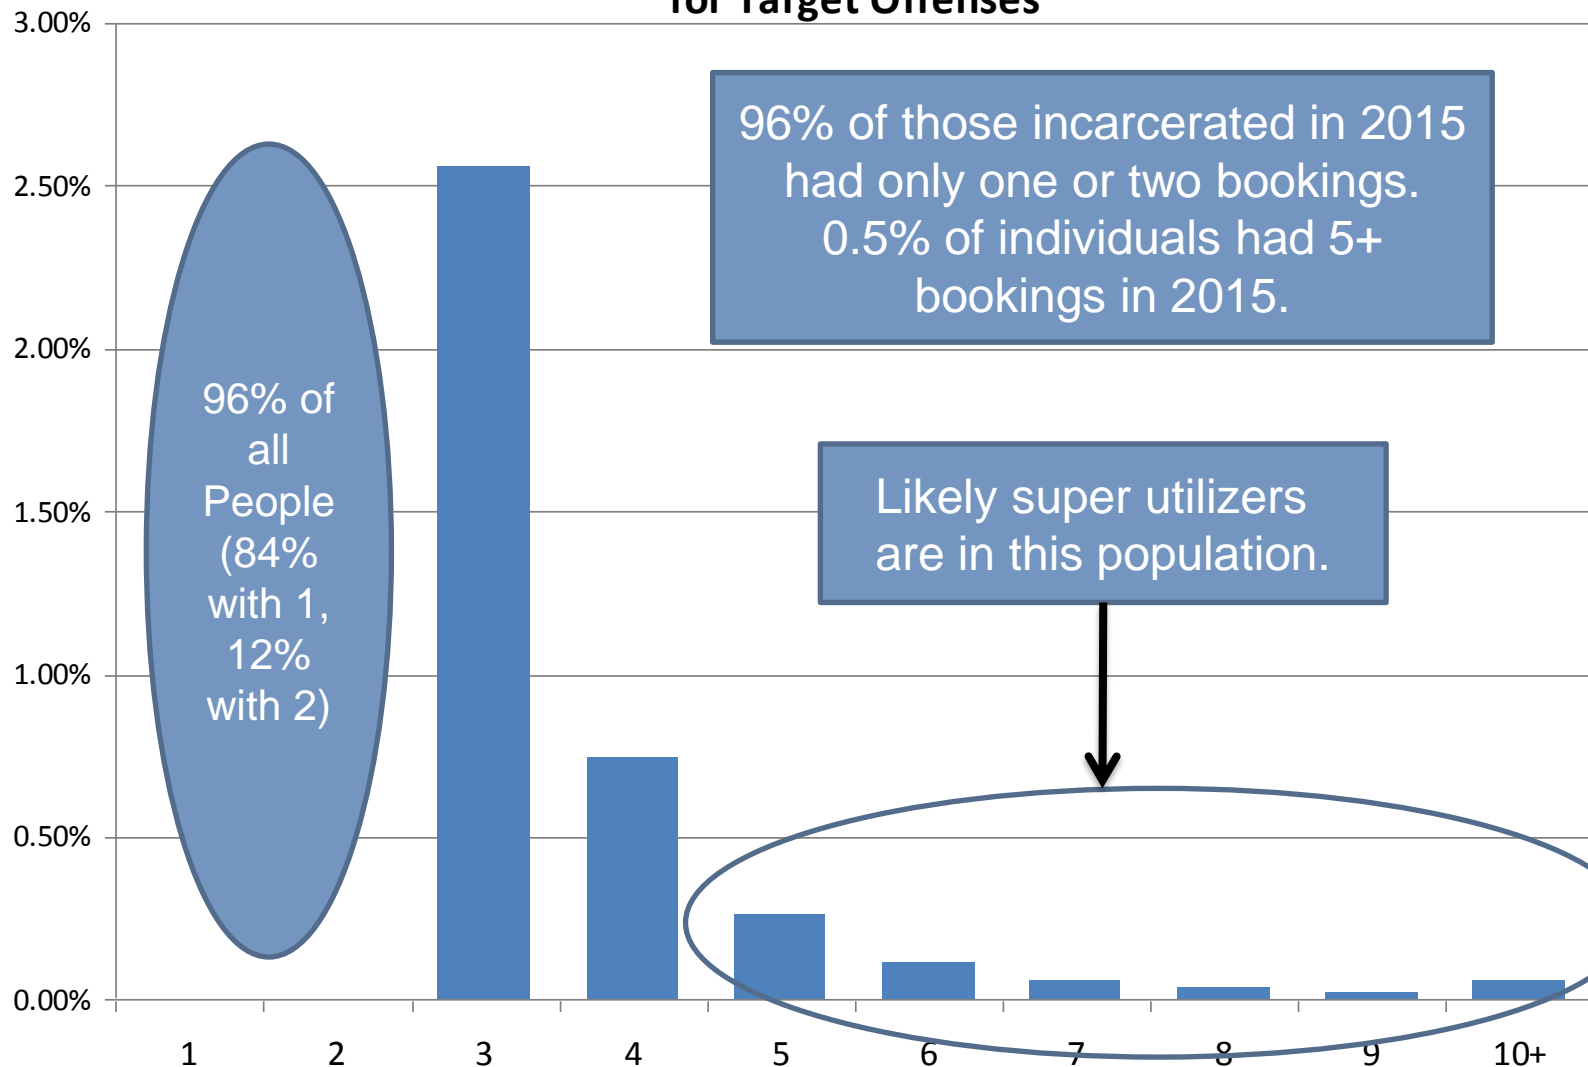

Probability-based Identification

Super Utilizers of jail facilities are identified by their probability of future incarceration for key offenses at any point in time.

Example Variable – Number of Target Incarcerations

**Number of Incarcerations in 2015
for Target Offenses**

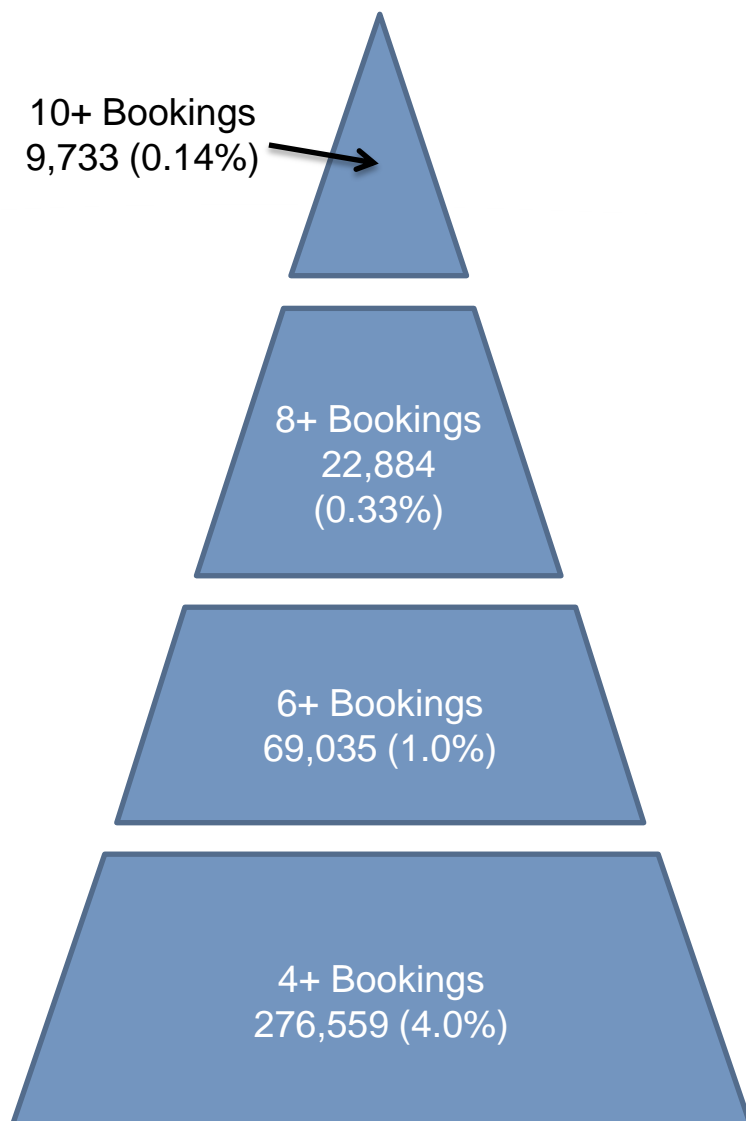

Example Variable – Number of Addresses

Number of Addresses Recorded During Incarcerations in 2015

How many people over-utilize jail facilities?

A significant number of individuals have multiple bookings in jails annually and may be considered super utilizers.

** Booking data analyzed from 2015*

Identifying Outliers

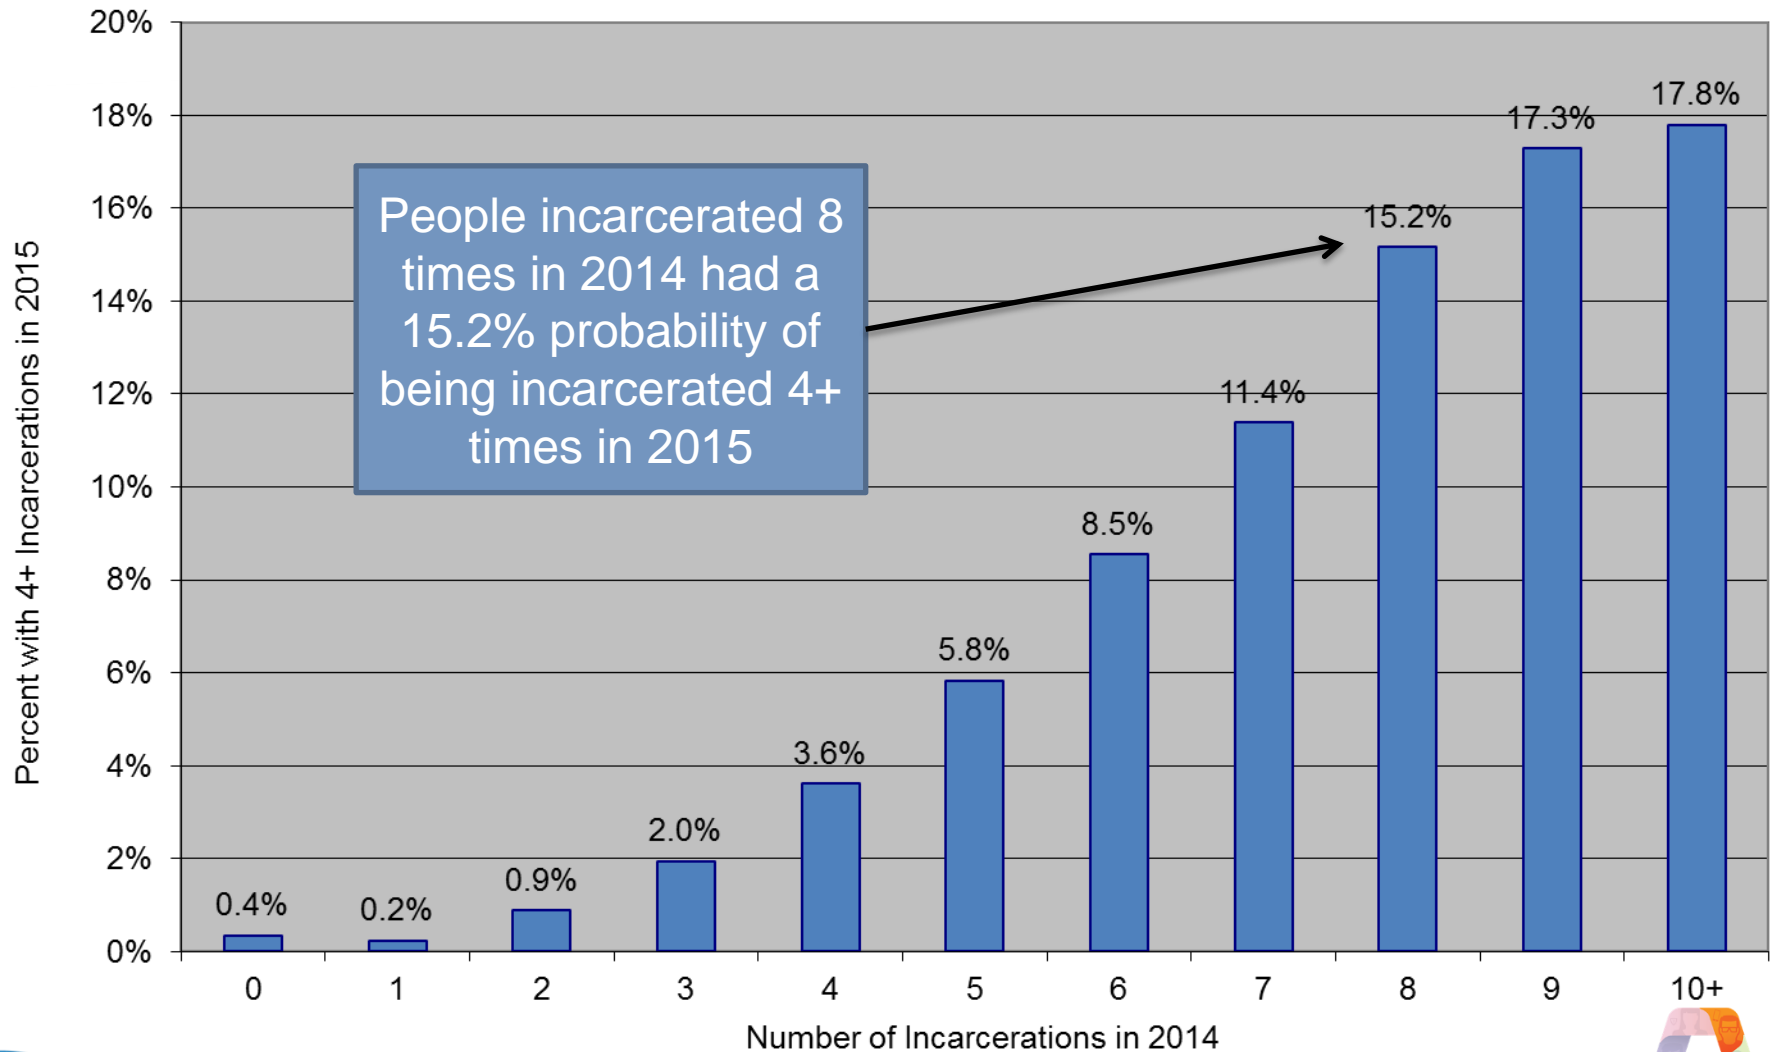

Number of Bookings vs. Number of Agencies in 2015

Each dot represents a single individual

Predicting Future Incarceration Activity

Incarceration Activity in 2014 is Predictive of 2015

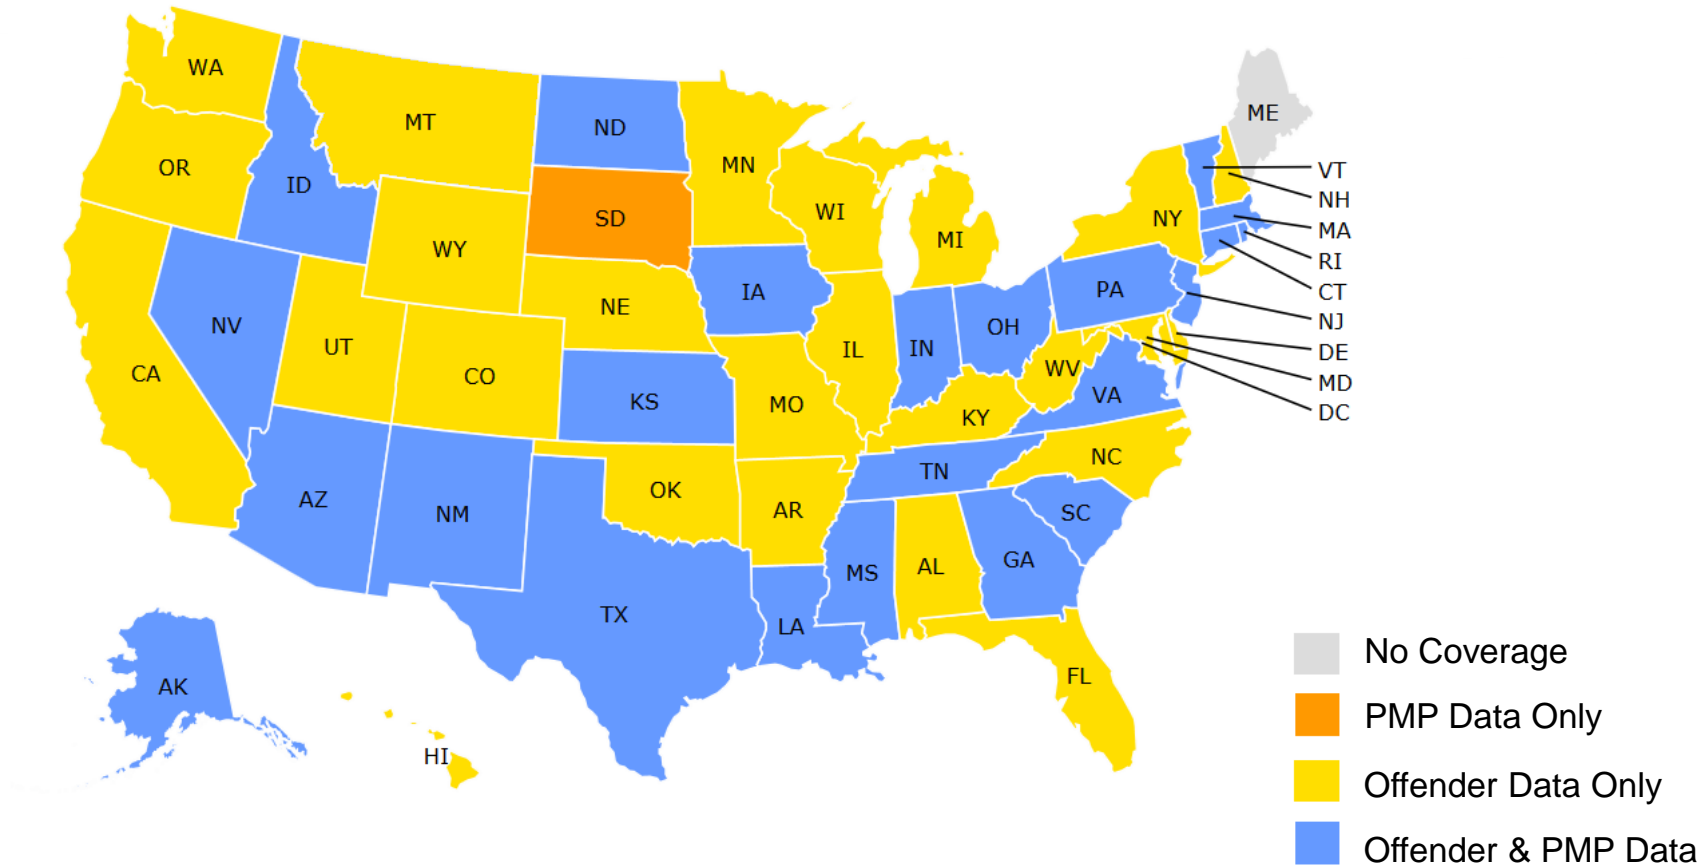

Identifying Super Utilizers

Using Narcotic Prescriptions Combined with Arrest Records

Appriss Data Overview

Appriss tracks prescriptions (PMP) for 24 states and Washington D.C.

**** Appriss has no rights to PMP data and very limited rights to offender data from some states***

What is NARxCHECK?

- NARxCHECK is a patented algorithm that analyzes controlled substance data from PDMPs and provides easy-to-use insights into a patient's controlled substance use creating a predictive analysis of the likelihood of drug overdose death.
- NARxCHECK quantifies risk with a 3-digit score, termed a “Narx Score”, which ranges from 000-999.
- Narx Scores have been computed for 3 different drug types,
 - Narcotics
 - Sedatives
 - Stimulants
- The distribution of the scores are such that in any given population, about 75% of scores will fall below 200, about 5% will be above 500, and only 1% will be above 650.

NARxCHECK as a Predictor of Risk of Opioid Related Death

- A study was conducted which overlaid the Ohio Prescription Drug Monitoring Program Data (PDMP) with a database from the State of Ohio on known unintentional overdose deaths to assess the predictive power of the NARxCHECK score.
- The study found that as the score increased, the risk of overdose death increased markedly.

Narx Score	Relative Odds of Overdose Death
000-099	1
100-199	8.4
200-299	10.8
300-399	10.6
400-499	17.5
500-599	33.8
600-699	59.7
700-799	80.7
800-899	106.6
900-999	185.9

- Appriss' proprietary narcotics abuse score is a good indicator of individuals with prescription abuse problems.
- As score increases, the risk of overdose increases dramatically

Target those individuals with the highest risk for overdose

Example Cases

Example 1 – Homeless in Oklahoma

- 185 bookings total between 2007 and 2016
- 68 bookings in 2015 alone

Charge	Number of Times Charged
Not Provided	12
ASSAULT AND BATTERY	79
DISORDERLY CONDUCT	4
FTA OR FAILURE TO APPEAR	5
INJURING A HOUSE OF WORSHIP	39
INDECENT EXPOSURE	39
LITTERING	1
OBSTRUCTING ROADWAY	24
PAROLE VIOLATION	1
PUBLIC INTOXICATION	222
THEFT	1
TRESPASSING	54

Information Provided at Booking				
Address	City	State	Number of Bookings	Notes
		OK	48	
5 N ON HWY 81 1 W	ANADARKO	OK	1	Address was not found in Google maps
HOMELESS	OKLA CITY	OK	36	
N/A	OKLAHOMA CTY	OK	1	
TRANSIENT	OKC	OK	83	
TRANSIENT	OKLAHOMA CITY	OK	11	
W 800 CALIFORNIA	OKLAHOMA CITY	OK	5	This is the address of a rescue mission

Example 2 – Homeless in Iowa

- 85 bookings total between 2010 and 2016
- 36 bookings in 2015
- Repeatedly used address that is not on google maps

Charge	Number of Times Charged
	18
ASSAULT AND BATTERY	2
INDECENT EXPOSURE	4
MALICIOUS MISCHIEF	1
PROBATION VIOLATION OR REVOCATION	1
PUBLIC INTOXICATION	62
THEFT	2
TRESPASSING	9
