The primary challenges facing Arizona Counties, from the perspective of the Boards of Supervisors, result from a series of state policy actions that are driving local costs in a very revenue constrained local environment. This situation is exacerbated by a constantly changing legislative membership with very limited understanding of local government. To prepare our membership for the 2018 Arizona Legislative Session and to improve our ability to tell the local story, CSA is currently executing the following pre-session activities:

- Analyzing each county's financial situation
- Developing county specific profiles and anecdotes
- Engaging in pre-session advocacy to brand the local problem
