# Agenda

## Early Childhood Urban Peer Learning Network: Strategies for Building the Supply of Child Care at the County-Level

- Welcome
- National Speaker – Linda Smith, Bipartisan Policy Center (10 minutes)
- County Speaker – Missoula County, Mont. (10 minutes)
- Questions & Interactive Discussion (30 minutes)
- Conclusion

# Child Care in 25 States: What We Know and Don't Know

Quantifying the Supply of, Potential Need for, and  
Gaps in Child Care Across the Country

January 2021

# Background

- There is broad bipartisan support for child care at all levels of government
- But little is known about the amount of care the country actually needs

BPC asked...

**How much additional child care does the country need?**

# What BPC Did

**Quantified the supply of, potential need for, and gaps in child care in 25 states as of 2019**

**The analysis gives policymakers, advocates, and stakeholders**

- A baseline from which to devise strategies to strengthen the quality of and access to child care
- A critical tool for holding federal, state, and local leaders accountable for improving child care access
- An evidence base to use data rather than anecdotes to evaluate the need for care

# Products of the Analysis

## Interactive Mapping Tool

- Quantifies supply, potential need, and gaps by:

State

County

Congressional District

State Senate District

Metropolitan Area

Opportunity Zone

- Also includes breakdowns by:

Minority Population

Under/Above 85% of State Median Income

Below Poverty Line

## 25-State Report

- Detailed methodology / National findings
- How to properly interpret gap findings for policy purposes
- Recommendations for how states can optimize data collection

# Project Overview: State Advisory Committee

Committee Member	State
<b>Samantha Aigner-Treworgy</b> Department of Early Education and Care	MA
<b>Nichole Anderson</b> Department of Family Services	WY
<b>Crystal Arbour</b> Office of Child and Family Services	ME
<b>Jill Bushnell</b> Child Care Collaborative Task Force	WA
<b>Patty Butler</b> Department of Public Health and Human Services	MT
<b>Tracey Campanini</b> Office of Child Development and Early Learning	PA
<b>Tracey Gruber</b> Office of Child Care	UT
<b>Chris Jones</b> Department of Human Services	ND
<b>Lori Masseur</b> Early Childhood Education and Head Start Collaboration Office <b>Nicol Russell</b> Teaching Strategies	AZ
<b>Jeana Ross</b> Department of Early Childhood Education <b>Julie Preskitt</b> Associate Professor of Health Care Organization and Policy, The University of Alabama at Birmingham School of Public Health	AL
<b>Kristi Snuggs</b> Division of Child Development and Early Education	NC
<b>Nicole Vint</b> Department of Health and Human Services	NE

All methodological decisions were agreed to by a committee of 12 state child care officials

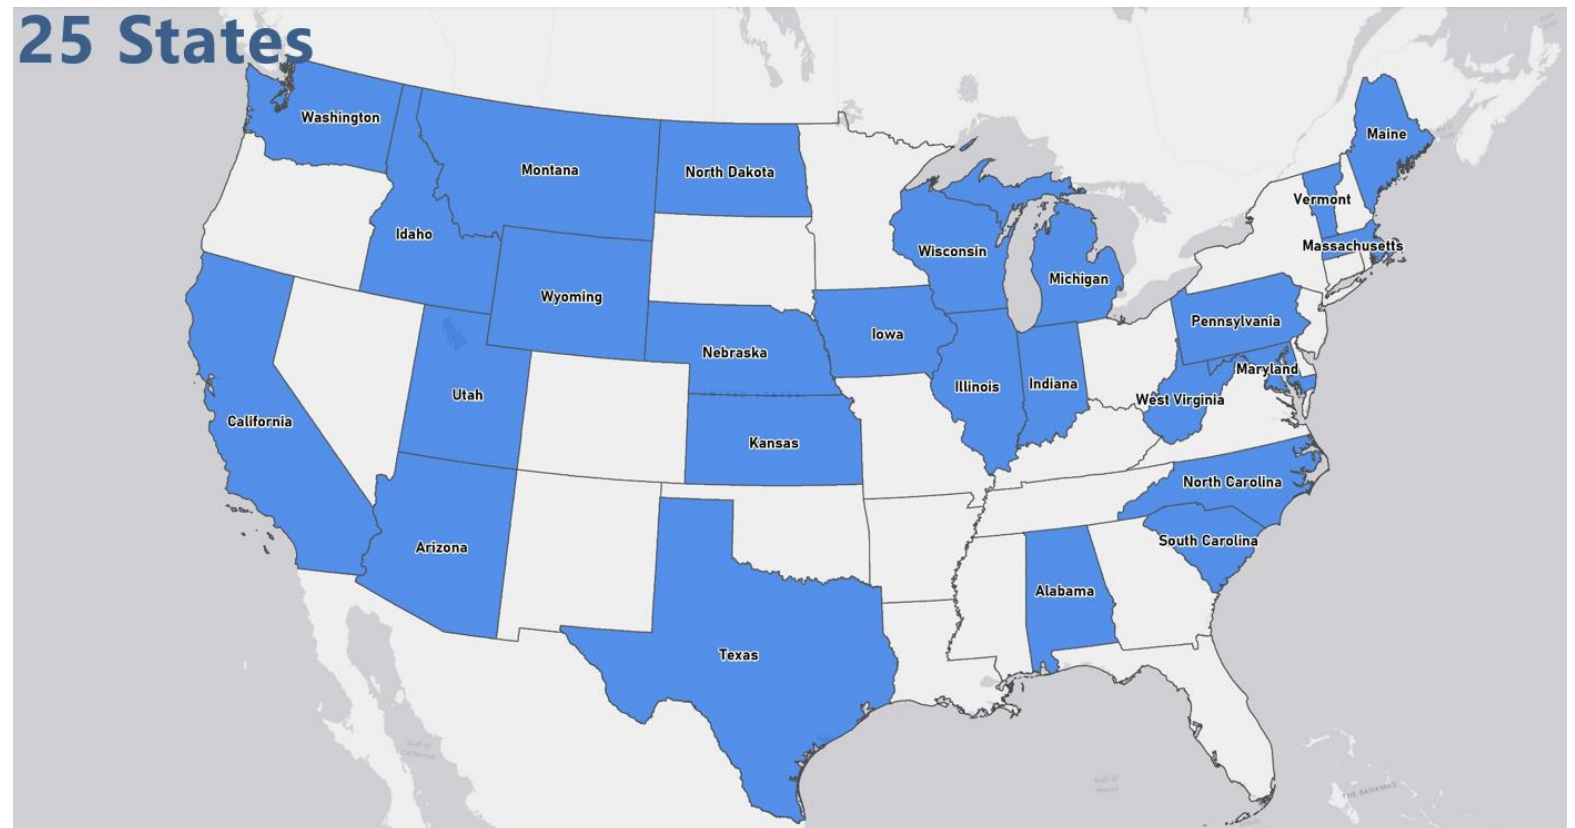

Provided high-level guidance:

- Developing definitions
- Identifying data resources
- Reviewing analytics
- How to present results

# Project Overview: 25 States

- Originally set out to map access in all 50 states
- 25 states were complete when the pandemic prompted stay-at-home orders in March and BPC halted the analysis

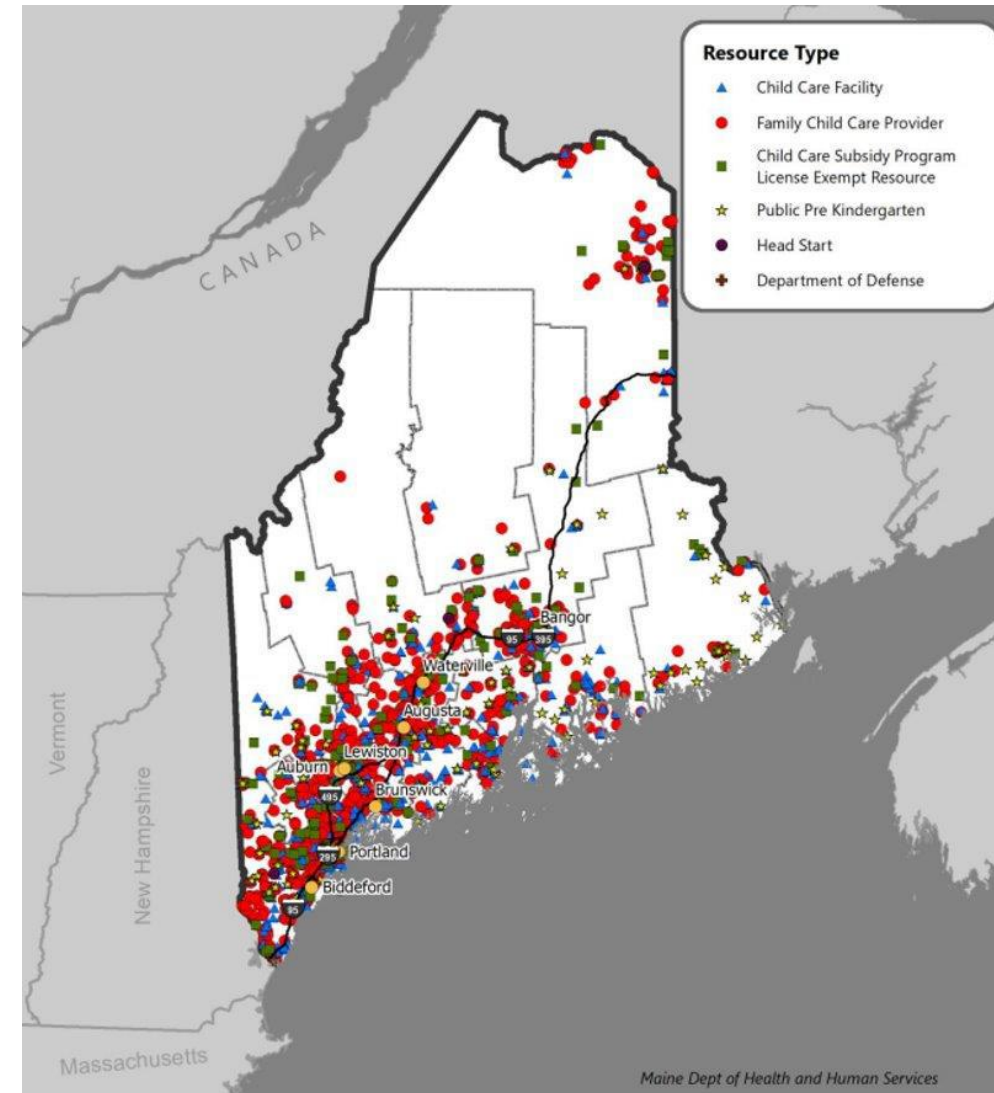

**Politically and  
geographically diverse  
25 states**

# Project Overview: Mapping Supply

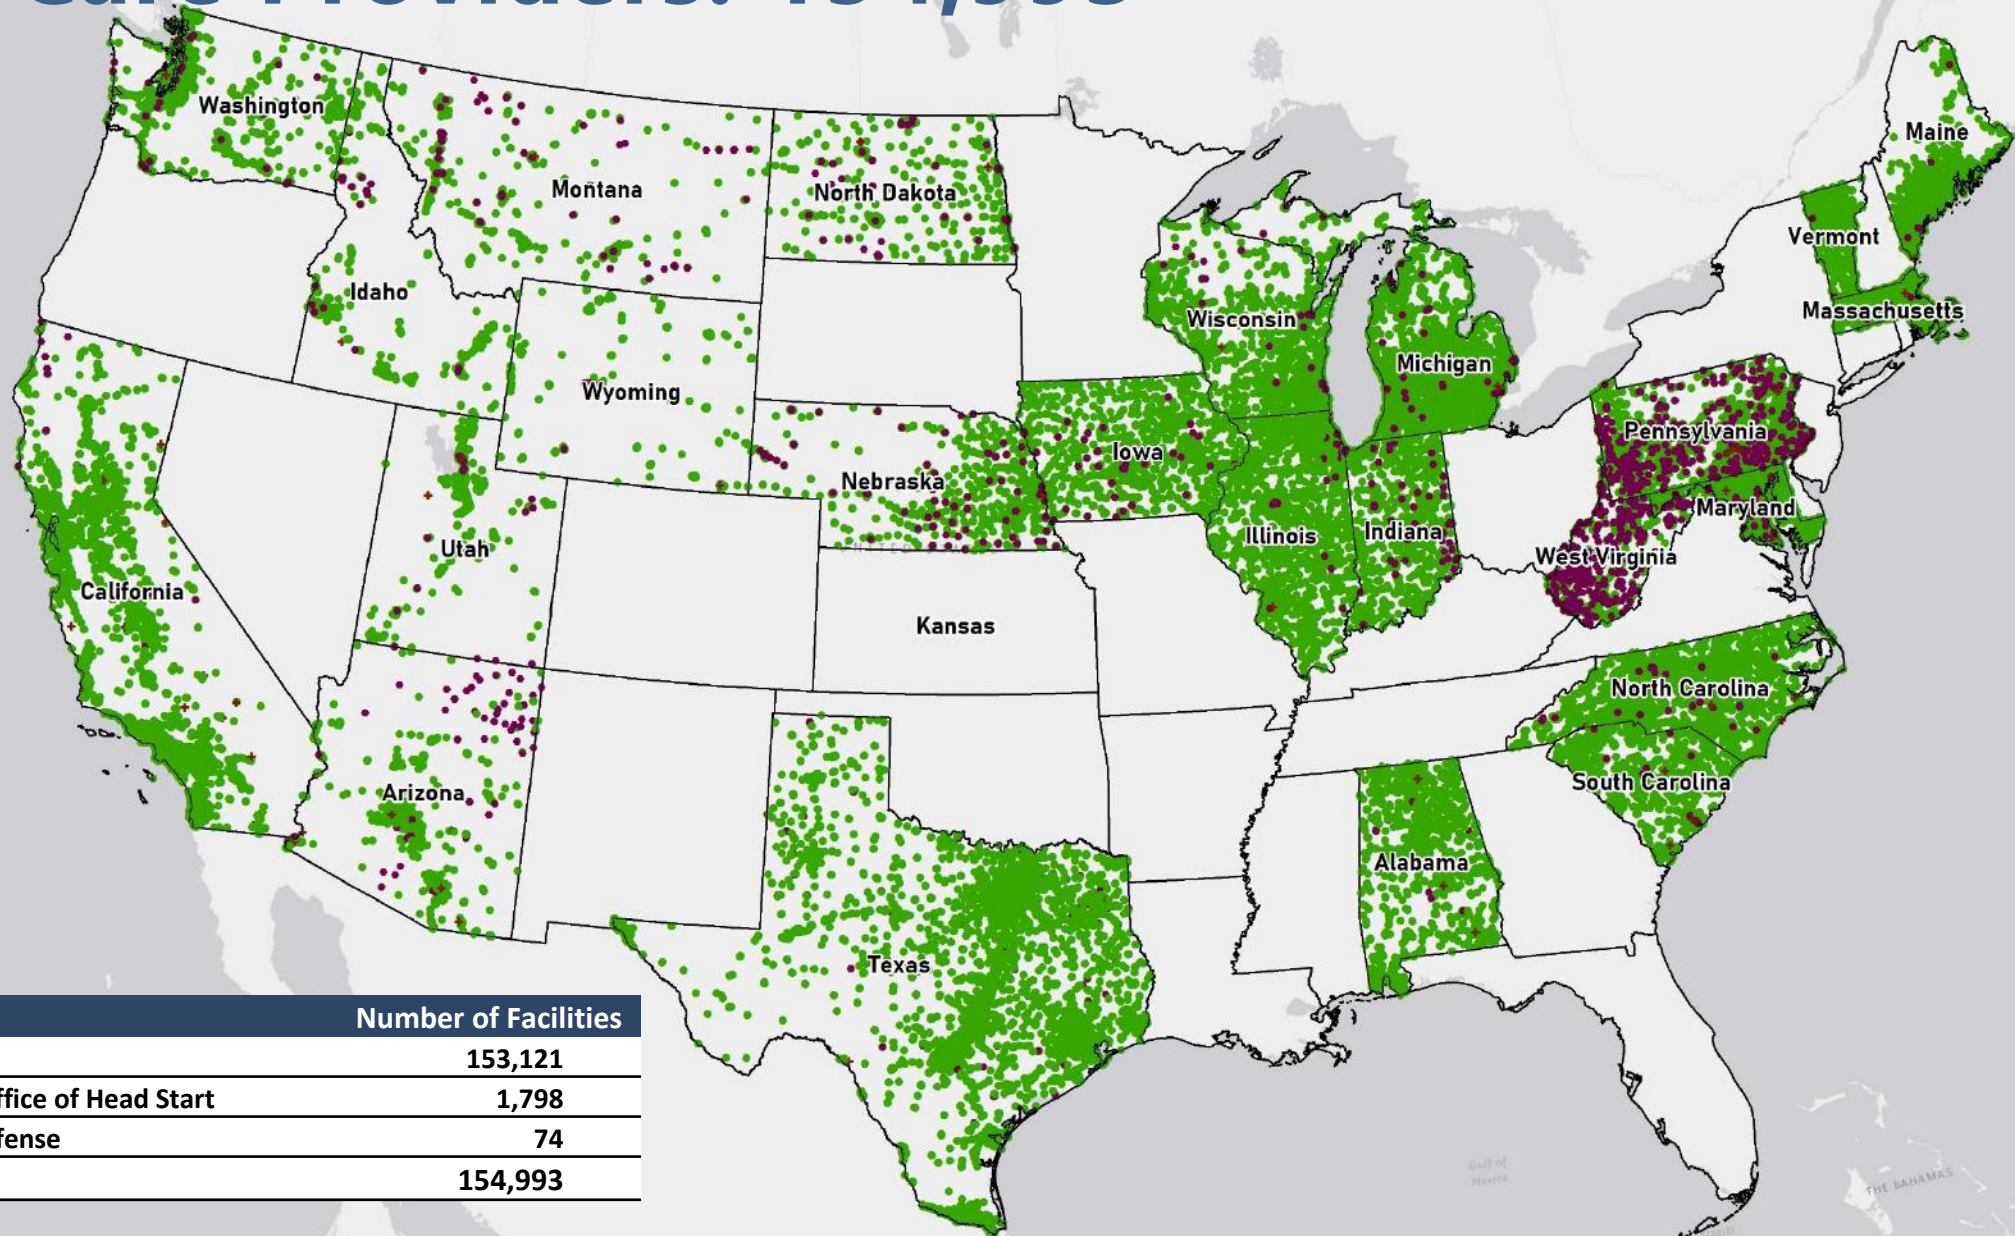

**Supply:** The number of child care slots offered by legally operated and state-recognized providers

- Definition included the entire range of formal child care settings available to parents
- To build datasets of each provider's location and capacity, BPC worked with:
  - Each state's child care and education agencies
  - Federal DHHS for Head Start data, AIAN tribes for tribal data, and DOD for military data
- Data was only incorporated after state approved

# Child Care Providers: 154,993

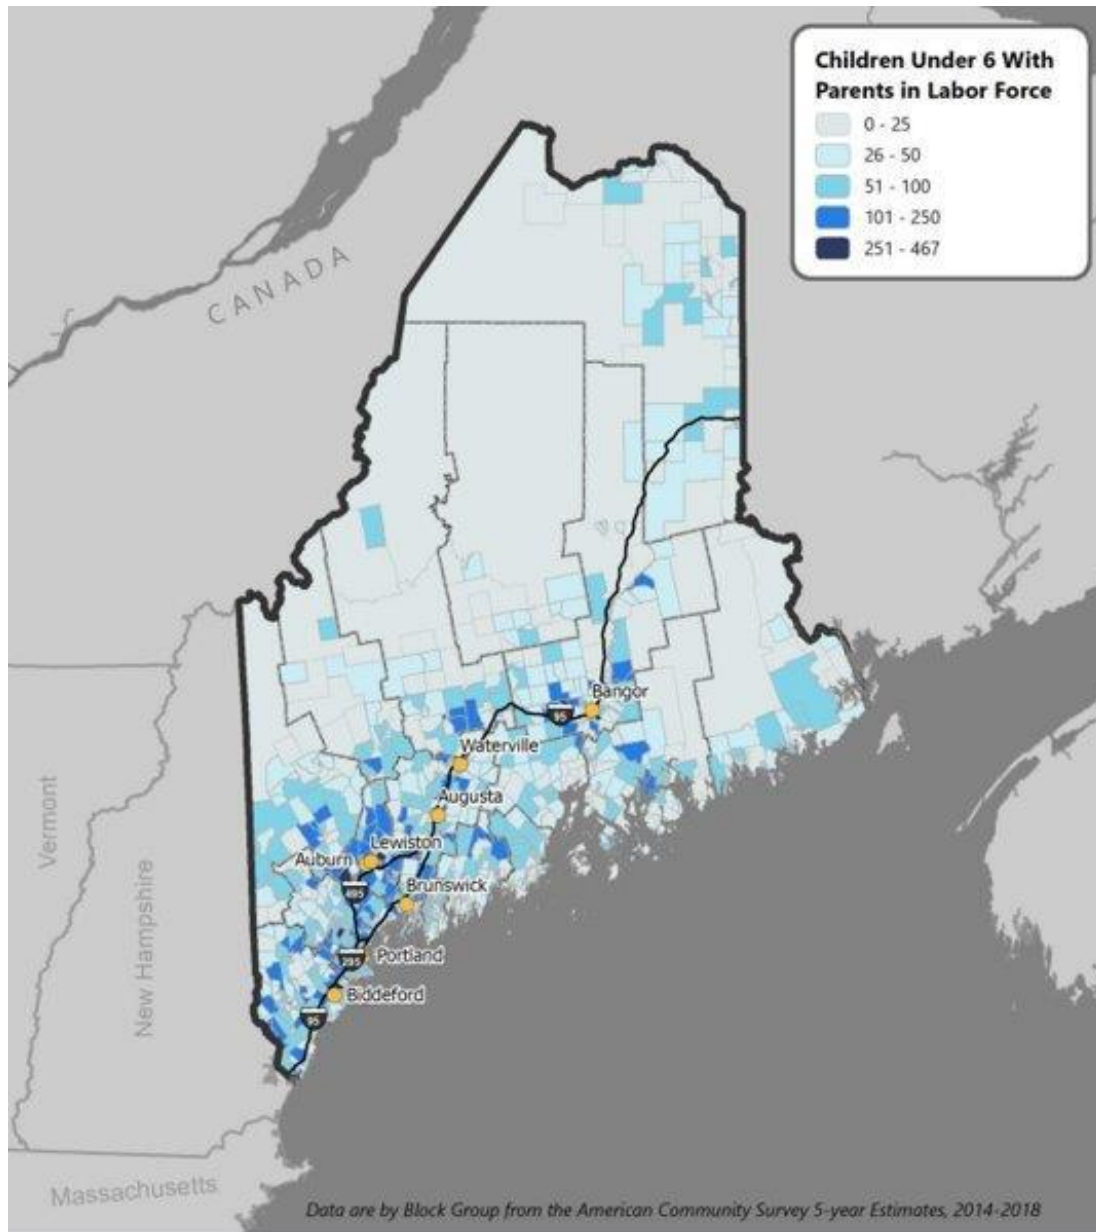

Source	Number of Facilities
State Provided	153,121
Additional from Office of Head Start	1,798
Department of Defense	74
<b>TOTAL</b>	<b>154,993</b>

# Project Overview: Mapping Potential Need

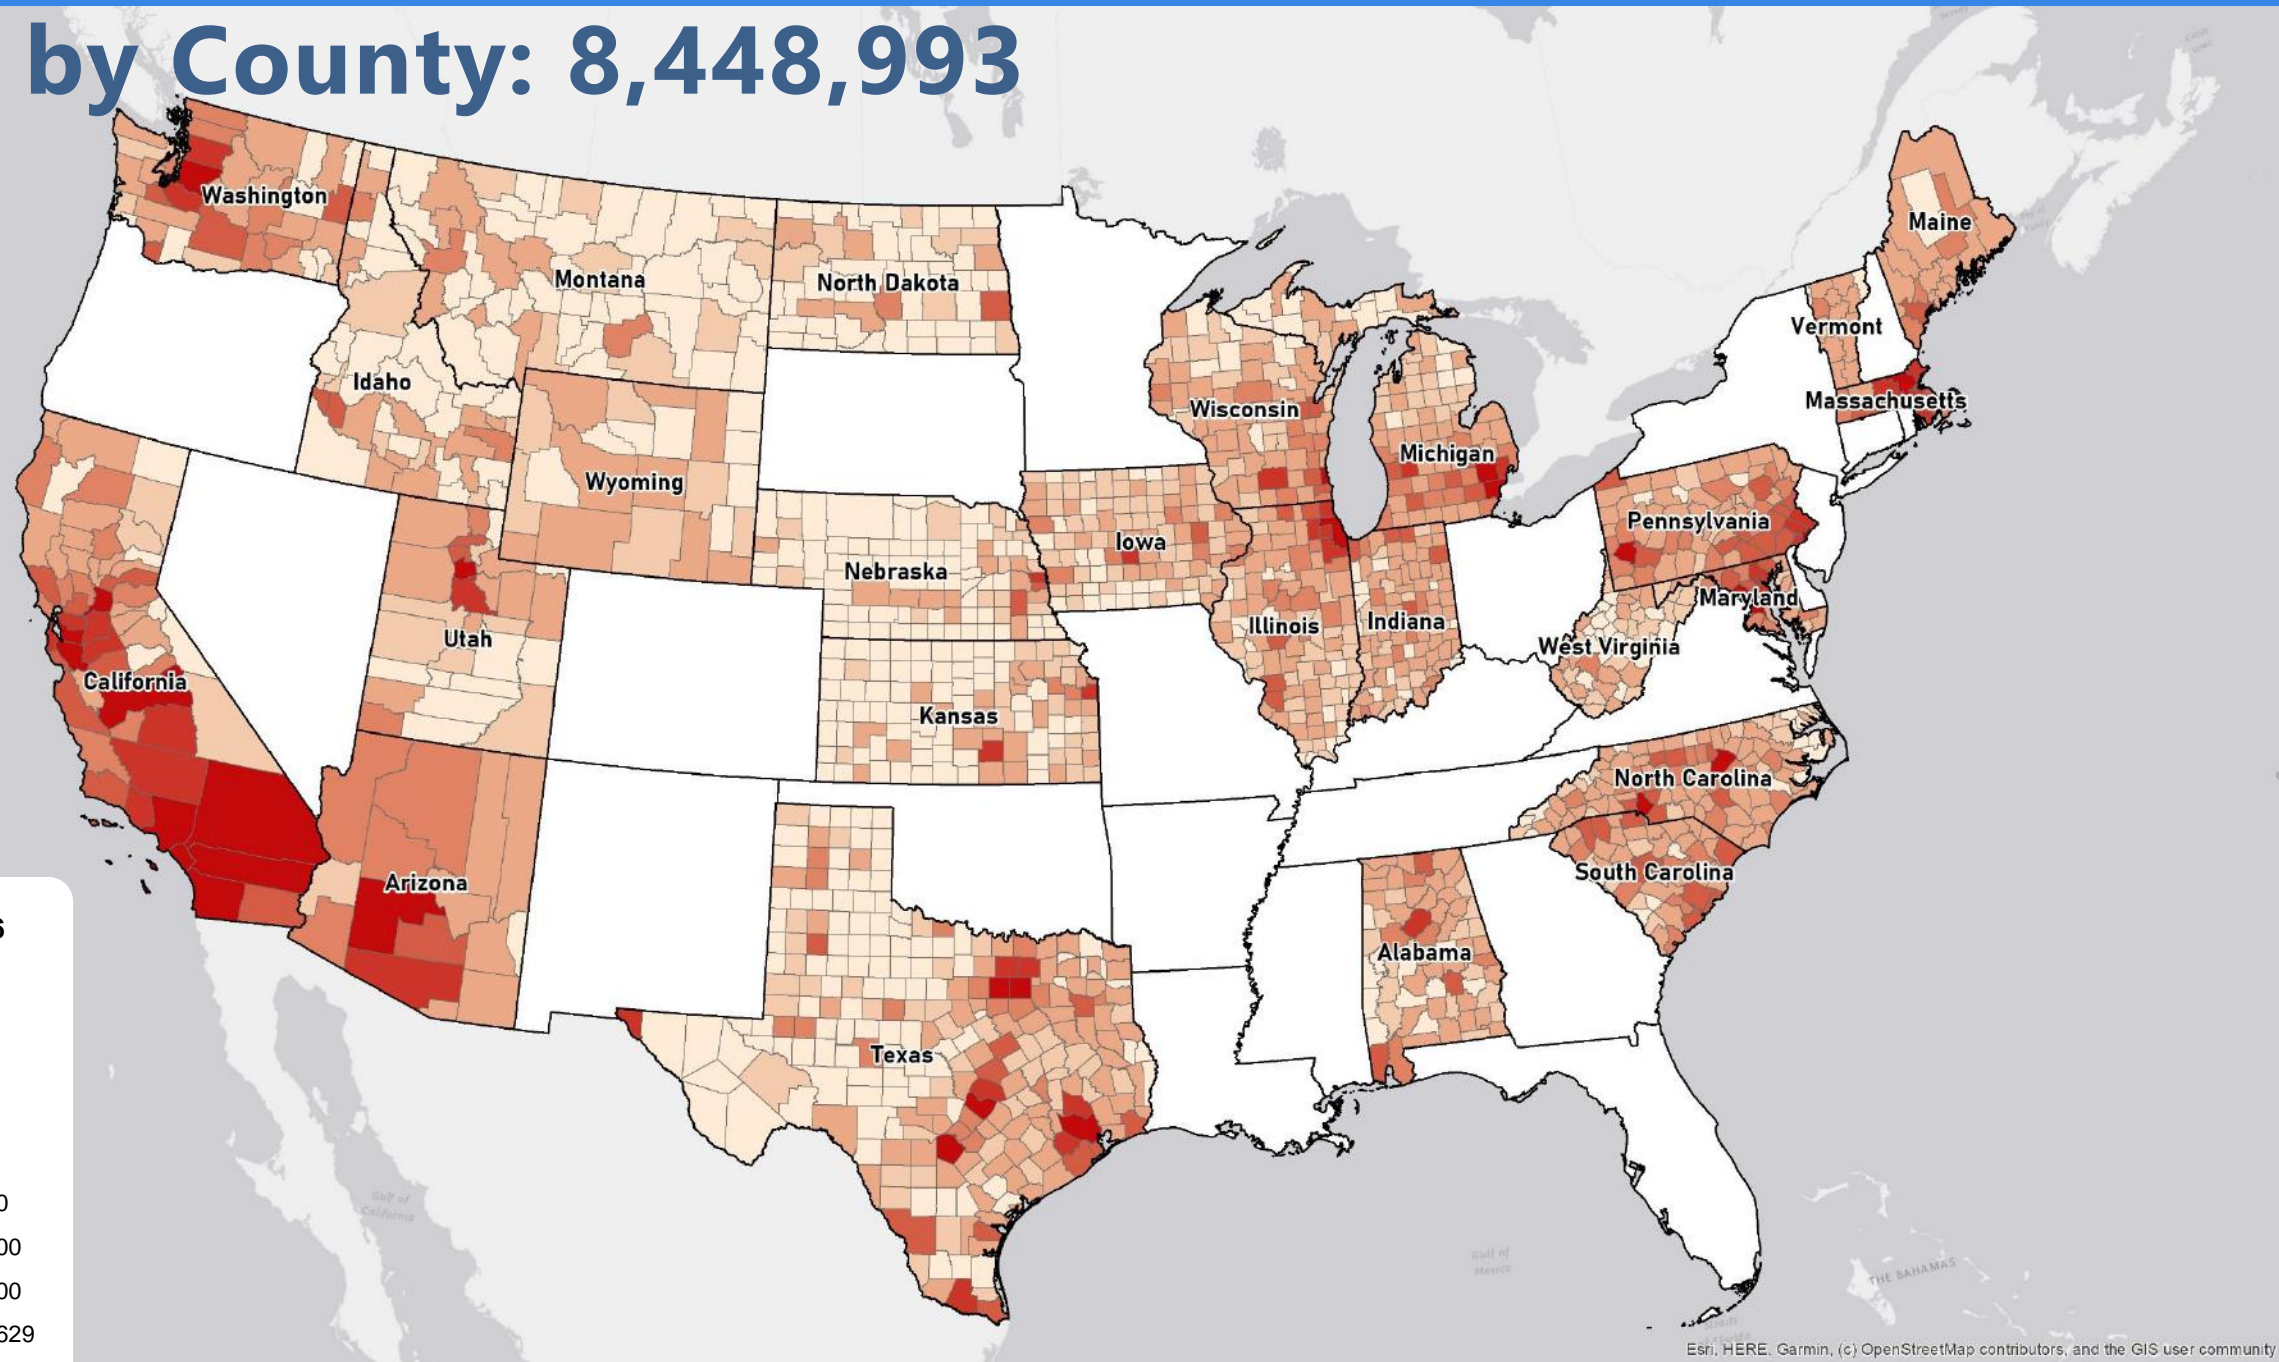

**Potential Need:** The number of children under six with all available parents in the labor force

- Not Demand: the rate at which families actually utilize or look for formal child care
  - May seasonal/family-related factors influence demand
  - No available data by geographic area
- Informative starting point for policy recommendations
- But interpretations must consider data on how much and what types of care communities actually use

# Need by County: 8,448,993

# Project Overview: Measuring the Gap

**Gap:** The number of children who potentially need care but whose families cannot reasonably access formal care by driving

Incorporated parent choice data: 86% of parents drive to child care; rural parents are much more likely to drive over 10 miles for child care

**Step 1:** each census block group was assigned a services area of a specific driving radius      Urban Areas: **3.5 mi**      Rural Areas: **10 mi**

**Step 2:** assumed families in a given block group could access the facilities within their service area

**Step 3:** potential need proportionally allocated to child care providers within service area until all provider capacity was filled

**Step 4:** quantified the number of children without access to child care by location

# Understanding Parent Choices to Interpret Findings

Any policy recommendation based on gap data must consider how much and what types of child care parents and families actually use

**Potential Need  $\neq$  Actual Demand**

Must interpret gap findings in conjunction with real parent choice data

What proportions of parents in your community...

- Need care at non-traditional hours?
- Prefer formal vs informal care?
- Prefer certain types of formal child care?

# Cultural Values Influence the Gap

Some communities place great value on caring for children within their families, rather than opting for formal child care

The analysis was susceptible to estimating higher gaps in these communities

- Some gaps may have less serious implications for families in real-life

# High-Level Findings

Child Care Gap Findings Across 25 States in 2019	
Potential Child Care Need	8,448,993 children
Child Care Supply	5,901,319 slots
Child Care Gap	2,682,262 children
Percent Child Care Gap	31.7% of children

**This estimate orients us around the magnitude of the child care gap  
But the gap is not uniform across the country**

# Disaggregating the Data: Rural vs Urban

Rural areas were underserved far more often than urban areas (even after using the distance adjustment)

Urban Avg: **28.9%**

Rural Avg: **35.1%**

National Survey Data:

- Only 38% of rural families said finding quality child care within their budget was easy (over 50% for urban)

Still unclear about the extent to which preferences for family/friend care reduce supply in rural areas

# Disaggregating the Data: Opportunity Zones

**Opportunity Zones:** Low-income communities designated by the Tax Cuts and Jobs Act of 2017 in which investors can receive tax incentives for supporting economic development.

The availability of child care should be part of any discussion related to investments in Opportunity Zones

Child Care Gaps within Opportunity Zones			
State	Total State Gap	Total Gap in OZs	Number of OZs
Alabama	40.0%	36%	158
Arizona	25.2%	33%	168
California	40.4%	45%	879
Idaho	28%	23%	28
Illinois	41.2%	40%	326
Indiana	47.7%	48%	156
Iowa	15.1%	19%	62
Kansas	35.5%	NA	NA
Maine	9.2%	14%	32
Maryland	20.0%	21%	149
Massachusetts	33.8%	34%	138
Michigan	30.2%	30%	288

Child Care Gaps within Opportunity Zones			
State	Total State Gap	Total Gap in OZs	Number of OZs
Montana	48.6%	49%	25
Nebraska	18.5%	20%	44
North Carolina	57.0%	57%	252
North Dakota	21.4%	12%	25
Pennsylvania	28.7%	24%	300
South Carolina	16.1%	15%	135
Texas	5.8%	8%	628
Utah	64.1%	65%	46
Vermont	23.4%	22%	25
Washington	45.4%	46%	139
West Virginia	39.5%	39%	55
Wisconsin	40.6%	34%	120
Wyoming	27.6%	16%	25

**Red:** gap higher across OZs than across state

**Blue:** gap higher across state than across OZs

# Disaggregating the Data: Socioeconomic Characteristics

Investigated whether a range of socioeconomic characteristics were associated with changes in the size of the child care gap

Compared the statewide gap to the gap in block groups...

- With a high percent of minority residents
- Where the median household income is below 85% of the state median
- Where the median household income is above 85% of the state median
- Where a high percent of residents live below the federal poverty line

Socioeconomic trends are different in every state and must be closely reviewed using the interactive map

# Zero to Five Missoula County

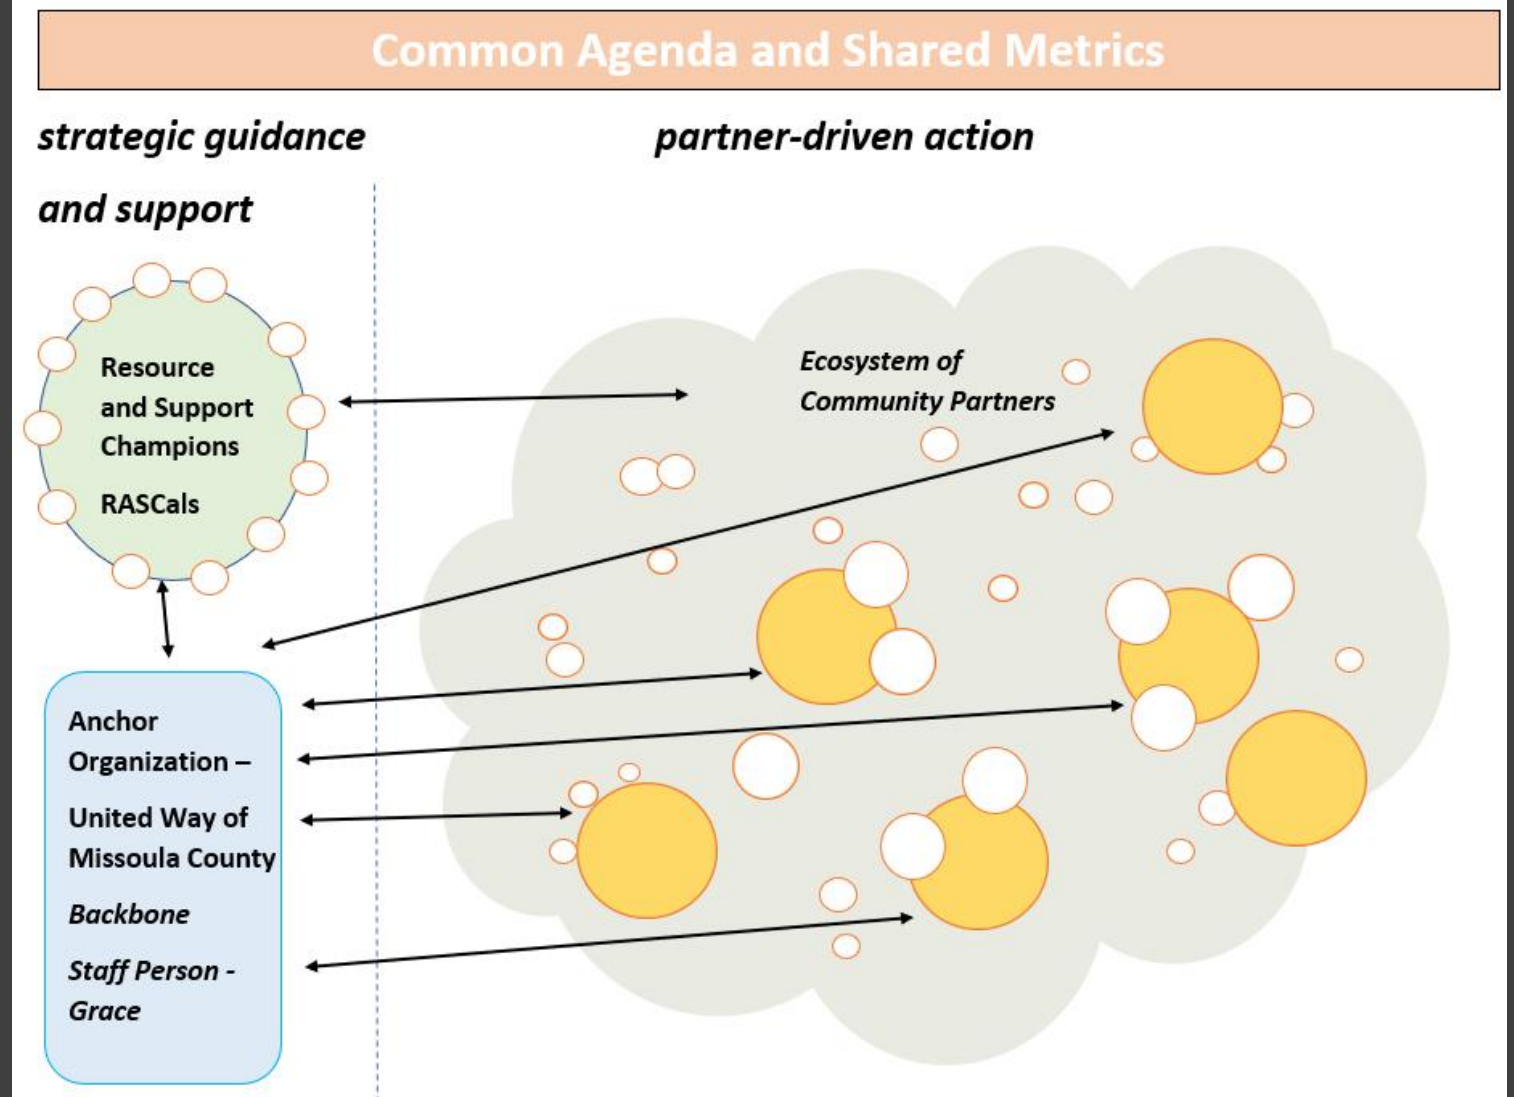

Building a multi-sector approach to  
kindergarten readiness for all

Using and sharing data across the EC  
system and community

Partnerships for crisis response  
and long-term planning

# Using a collective-impact approach

# Engaged community leaders

K12 Ed

Government

Business

Philanthropy

Higher Ed

Anchor Organization

Families/Parents

Early Care and Education

Faith

Health Care

# Kindergarten Entry Assessment

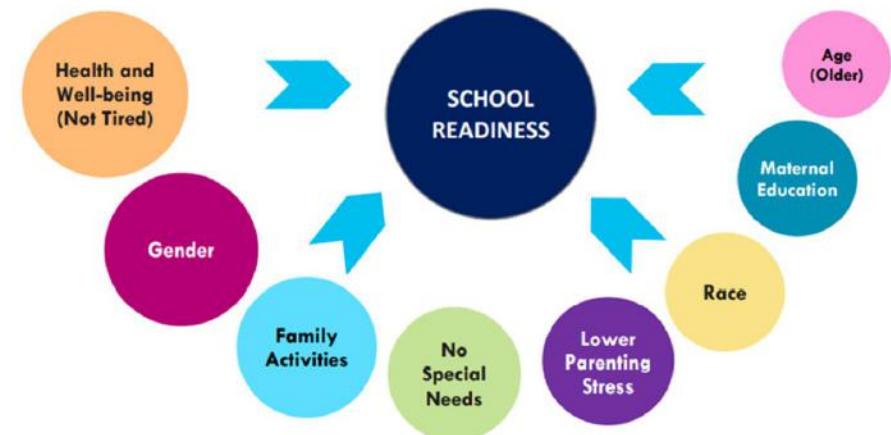

**232 children, 18 kindergarten classrooms**  
**Parent information only/Missoula Online Academy: 55 children**

*Different classrooms,  
different findings of readiness*

Parents completed questionnaires about life experiences birth – five, in order to connect specific experiences to specific readiness outcomes. Key predictors of overall school readiness (in order of strength):

# Partnerships for short and long term needs

---

## COVID-19 Pandemic Coordination

- County Child Care Stabilization Grants
- Tuition support and relief funds to families
- Community child care needs assessments
- Coordinated referral, technical assistance, and funding

## Long term planning

- Early childhood support in K-12 system
- Child Care Shared Services Alliance
- Missoula Promise phased plan for 0-5 supports

# Discussion Questions

- How is your county ensuring that child care options are available for infants and toddlers?
- If your county used CARES funding or local relief for child care, how were those dollars used? What did they fund?
- What concerns or issues are you hearing from parents around child care access and affordability?
- How is your county addressing equity issues regarding barriers to child care access?
- How does your county engage and support child care providers?
