

REDUCING JAIL POPULATIONS: JAIL DATA INITIATIVE DEMONSTRATION

COUNTY GUIDE FOR REDUCING JAIL POPULATIONS AND COSTS

SEPTEMBER 7, 2022

County officials are implementing data-driven and evidence-based policies, practices and programs to decrease jail populations, reduce associated costs and meet the social and safety needs of communities. Annually, county jails process 8 million admissions and spend \$29 billion on correctional facilities.[1] The Pew Charitable Trusts <[http://www.pewtrusts.org/en/research-and-analysis/issue-briefs/2021/01/local-spending-on-jails-tops-\\$25-billion-in-latest-national-wide-data](http://www.pewtrusts.org/en/research-and-analysis/issue-briefs/2021/01/local-spending-on-jails-tops-$25-billion-in-latest-national-wide-data)> reported in 2021 that county corrections costs increased 521 percent from 1977 to 2017.

Through collaborative efforts such as local public safety planning boards or criminal justice coordinating councils, counties are looking at data from various departments and entities to identify factors that drive jail population growth and exploring solutions to improve outcomes.

Common drivers of jail populations include:[2]

- Bookings and/or arrests, especially for low-level charges such as misdemeanors
- Pretrial length of stay
- Technical violations of community supervision, and
- Recidivism.

NEW RESOURCE: JAIL DATA INITIATIVE

When determining local jail population drivers, counties may choose to look at neighboring counties' data or others within their state and/or nationally as comparisons. The Jail Data Initiative <<https://jaildatainitiative.org/>> at New York University, in partnership with The Pew Charitable Trusts, is gathering data on jail populations around the country. Using online data rosters from roughly a third of the jails in the United States, the project analyzes daily populations, lengths of stay, charge and demographic profiles of those incarcerated, admissions, release statistics and more. Visit their website <<https://jaildatainitiative.org/>> to explore and compare local data metrics.

BOOKINGS AND/OR ARRESTS

Reducing the number of people arrested and booked into jails for low-level offenses and misdemeanors through diversion and citations, as well as outstanding warrants for failing to appear in court or not paying fines and fees, can help reduce jail populations by reserving detention beds for people who are a risk to public safety or a serious flight risk. This can also improve outcomes for individuals by keeping them connected to their communities.
